MEMORANDUM

To: Beverly McKeone, P.E. – New Source Review Program Manager

From: Ed Andrews, Engineer

Date: September 22, 2015

Subject: Class II Administrative Update of R13-2548A (R13-2548B) for Mountain State Carbon LLC (009-00002)

On August 3, 2015, the DAQ received a request from Mountain State Carbon LLC to update Permit R13-2548A. This request was filled as a Class II Administrative Update under 45 CSR 13. The application published a Class I legal ad in *The Weirton Daily Times* on August 6, 2015, and paid the Class II Filing Fee.

The application requested Condition 4.1.2. be removed from the permit since the screening unit has been removed from the facility. The removal of the screening unit does not increase the current permitted emission limits or affect the applicability status with any existing rule or regulation. The applicant requested to remove the reference to the Second Unit in Condition 4.2.1. and update the language in Condition 4.2.1.3. to reflect that the average scoop weight has been established.

These changes to Permit R13-2548B do not affect any emission limit or applicability of the affect source with respect to any applicable rule or regulation. Thus, the writer recommends that Mountain State Carbon LLC be issued Permit R13-2548B as requested in accordance with 45 CSR 13.
