RE: Permit Applicability Determination
Nobel Energy, Inc.
Sand Hill 26 (SHL 26)
Marshall County, WV
Determination No. PD16-066
Plant ID No. 051-00235

Dear RJ Moses:

It has been determined that a permit will not be required under 45CSR13 for the Sand Hill 26 (SHL 26) natural gas production facility. This determination is based on information included with your permit determination form dated October 24, 2016 and received on November 18, 2016, which indicates that the increase in emissions will not exceed two (2) lbs/hr OR five (5) tons/year of total Hazardous Air Pollutants (HAPs); six (6) lbs/hour AND ten (10) TPY of any regulated pollutant; or, trigger a substantive requirement of any State or Federal air quality regulation.

Please bear in mind, however, that any additional changes to the proposed facility may require a permit under 45CSR13. Furthermore, pursuant to 45CSR13-5.14, records briefly describing the proposed change, the pollutants involved, the potential to emit for each pollutant increased or added shall be maintained by the owner or operator for at least two years and made available to the Director upon request.

Should you have any questions, please contact the undersigned engineer at (304) 926-0499 ext. 1203.

Sincerely,

Jonathan Carney

Jonathan Carney, P.E.
