MEMORANDUM

To: Bev McKeone
From: Jerry Williams
Date: March 28, 2017
Subject: PD17-020, EQT Production Company (017-0044) OXF-45 Pad

EQT Production Company submitted PD17-020 on March 20, 2017. PD17-020 was submitted to request a determination to install a 400 barrel (bbl) condensate tank to replace three (3) existing 210 bbl condensate tanks. Additionally, EQT requests that the existing permit be rescinded due to the facility being below 45CSR13 emission thresholds.

General Permit G70-A133 was issued on February 11, 2015 and included three (3) 210 bbl condensate tanks. This permit determination request directly affects a permit condition in G70-A133. Therefore, a permit will be needed. A modification will be required under 45CSR13 to make the requested change, due to the change from a G70-A to a G70-D registration. 45CSR13 does not provide an option for rescinding a permit based on emission levels dropping below stationary source thresholds.
