RE: Southwestern Energy
Margaret Sue Kelley Pad (Permit No. R13-3023)
Class I Administrative Update

Director Durham:

Southwestern Energy Company (SWN) owns and operates the Margaret Sue Kelley Pad (Kelley Pad), a natural gas production facility in Wetzel County, West Virginia. The Kelley Pad operates under WVDEP Permit No. R13-3023.

SWN is submitting this Class I Administrative Update to request the removal of the facility's compressor engine from the permit. The compressor has historically been used to handle the flash gas produced by the facility's operations. However, the amount of flash gas has decreased to a point where the compressor is no longer necessary (operation of the unit is redundant and produces combustion emissions while handling minimal, if any, flash gas); therefore, the compressor engine will be permanently removed from service at this facility.

SWN is requesting that this source (emission Unit ID EU-MC1337) be removed from the permit, and the permit be re-issued with the change reflected.

We appreciate your review of this submittal. If you have any questions or comments, please contact me at (304) 884-1652 or by email at kristi_evans@swn.com .

Respectfully,

Kristi R. Evans, GSP
Southwestern Energy
Health, Safety, and Environmental Coordinator
