Re: Antero Resources Corporation - Mackay Wellpad - 085-00041 - G70-A115A

Antero has applied for a Class I Administrative Update to current general permit registration G70-A115 to correct a typographical error in the number of condensate tanks listed in the equipment table. Currently there are six condensate tanks listed when actually there are ten. The emissions in the original application are based on ten tanks.

Since the changes will result in no change in emissions and no new equipment will be added, it is the writers opinion that Antero be granted this Class I Administrative Update.
