Re: Noble Energy, Inc.- Web 22 - 051-00223 - G70-A187A

Noble has applied for a Class I Administrative Update to current general permit registration G70-A187 to correct typographical errors in produced water and condensate throughput as well as total HAP emissions.

Since the changes will result in no change of emissions, it is the writers opinion that Noble be granted this Class I Administrative Update.
