AIR QUALITY PERMIT NOTICE

Notice of Intent to Approve

On April 30, 2015, Everett Energy LLC applied to the WV Department of Environmental Protection, Division of Air Quality (DAQ) for a permit to construct a dry coal and mineral separation facility to be located near Fort Gay, Wayne County, WV at latitude 38.044149 and longitude -82.515275 using datum NAD83. A preliminary evaluation has determined that all State and Federal air quality requirements will be met by the proposed facility. The DAQ is providing notice

to the public of its preliminary determination to issue the permit as R13-3247.

The following potential emissions will be authorized by this permit action: Particulate Matter, 206.86 tons per year (TPY), Particulate Matter less than 10 microns, 61.33 TPY, Nitrogen Oxides, 3.67 TPY, Carbon Monoxide, 0.67 TPY, Sulfur Dioxide, 1.15 TPY, Volatile Organic Compounds, 0.06 TPY, and total hazardous air pollutants, 0.009 TPY.

Written comments or requests for a public meeting must be received by the DAQ before 5:00 p.m. on Friday, July 24, 2015. A public meeting may be held if the Director of the DAQ determines that significant public interest has been expressed, in writing, or when the Director deems it appropriate.

The purpose of the DAQ's permitting process is to make a preliminary determination if the proposed modification will meet all State and Federal air quality requirements. The purpose of the public review process is to accept public comments on air quality issues relevant to this determination. Only written comments received at the address noted below within the specified time frame, or comments presented orally at a scheduled public meeting, will be considered prior to final action on the permit. All such comments will become part of the public record.

AIR QUALITY PERMIT NOTICE

Notice of Intent to Approve

On April 30, 2015, Everett Energy LLC applied to the WV Department of Environmental Protection, Division of Air Quality (DAQ) for a permit to construct a dry coal and mineral separation facility to be located near Fort Gay, Wayne County, WV at latitude 38.044149 and longitude -82.515275 using datum NAD83. A preliminary evaluation has determined that all State and Federal air quality requirements will be met by the proposed facility. The DAQ is providing notice to the public of its preliminary determination to issue the permit as R13-3247.

The following potential emissions will be authorized by this permit action: Particulate Matter, 206.86 tons per year (TPY); Particulate Matter less than 10 microns, 61.33 TPY; Nitrogen Oxides, 3.67 TPY; Carbon Monoxide, 0.67 TPY; Sulfur Dioxide, 1.15 TPY; Volatile Organic Compounds, 0.06 TPY; and total hazardous air pollutants, 0.009 TPY.

Written comments or requests for a public meeting must be received by the DAQ before 5:00 p.m. on Friday, July 24, 2015. A public meeting may be held if the Director of the DAQ determines that significant public interest has been expressed, in writing, or when the Director deems it appropriate.

The purpose of the DAQ's permitting process is to make a preliminary determination if the proposed modification will meet all State and Federal air quality requirements. The purpose of the public review process is to accept public comments on air quality issues relevant to this determination. Only written comments received at the address noted below within the specified time frame, or comments presented orally at a scheduled public meeting, will be considered prior to final action on the permit. All such comments will become part of the public record.

RE: Application Status: Complete
Everett Energy LLC
Powdermill Coal Separation Facility
Application No. R13-3247
Plant ID No. 099-00120

Dear Mr. McCoy:

Your application for a construction permit for a coal preparation plant was received by this Division on April 30, 2015 and assigned to the writer for review. On April 29, 2015, the applicant published a Class I legal advertisement in *The Wayne County News*. On June 2, 2015, the DAQ received an original affidavit of publication. In a email dated June 11, 2015, the DAQ requested corrections. On June 15, 2015, the DAQ received an email response with revised application pages. Upon further review of said application and additional information received, it has been determined that the application is complete as of June 15, 2015.

This determination of completeness shall not relieve the permit applicant of the requirement to subsequently submit, in a timely manner, any additional or corrected information deemed necessary for a final permit determination.

Should you have any questions, please contact me at (304) 926-0499 ext. 1210.

Sincerely,

Daniel P. Roberts, Engineer Trainee

Donna,

Hey. Thanks for the quick turn around. You addressed everything that needed attention. I had a typo in my email... TP-03 in the calcs was what appeared need changed and you got it. I'll add these today and get it off to Bev requesting approval to go to notice.

Thanks,
Dan

Subject: Everett Energy LLC - Powdermill Coal Separation Facility - Facility ID No 099-00120 - Application R13-3247

Donna,

Hey. I have been reviewing the application you prepared and submitted for Everett Energy LLC. It looks like everything is there and in order except for two small things as follows.

1. On page 1 of 1 of the application, item 1 lists the name of the applicant as "Everett Energy, LLC" with a comma. However, it is registered with the WVSOS office as "Everett Energy LLC" with no comma.
2. In the Process Description and Material Flow Diagram, transfer point TP-01 is listed with a control device of TC-FE. However, in the calculations spreadsheet, TP-03 is listed with TC-MDH.

Just make any corrections as necessary and email them to me. I have attached a copy of the draft permit and fact sheet as they stand now.

AIR QUALITY PERMIT NOTICE

Notice of Application
Notice is given that Everett Energy, LLC has applied to the West Virginia Department of Environmental Protection, Division of Air Quality, for a Reg. 13 Permit Application for a screening and material separation facility located on Powdermill Branch, near Fort Gay in Wayne County, West Virginia. The facility coordinates are as follows: latitude 38.046004 and longitude -82.515275.

The applicant estimates the potential to discharge the following Regulated Air Pollutants will be: particulate matter baseline emissions of 8 tons per year, point source emissions particulate matter less than 10 microns total of 4 tons per year, and the controlled facility emission total of 207 tons per year. The applicant estimates the potential to discharge the following uncontrolled Criteria Air Pollutants from the use of generators will be: NOx 17.438 tons per year, CO 3.758 tons per year, VOC 1.389 tons per year, SO2 1.153 tons per year, PM10 1.238 tons per year. The applicant estimates the potential to discharge the following uncontrolled Hazardous Air Pollutants will be: Benzene 0.002187 tons per year, Butadiene 9.16E-05, Toluene 0.000959 tons per year, Xylenes 0.000668 tons per year, Acetaldehyde 0.001798 tons per year, Formaldehyde 0.002766 tons per year, Acrolein 0.000217 tons per year, Naphthalene 0.000199 tons per year.

Startup of operation is planned to begin upon permit approval. Written comments will be received by the West Virginia Department of Environmental Protection, Division of Air Quality, 601 57th Street, SE, Charleston, WV 25304, for at least 30 calendar days from the date of publication of this notice.

Any questions regarding this permit application should be directed to the DAQ at (304) 926-0499, extension 1227, during normal business hours. Dated this the 24th day of April 2015

Dan,

Just a note to let you know that I still have not received the Certificate of Publication from the Wayne County News. I called and they are sending me "another" copy supposedly - they are the worst ever for advertising. Anyway, I'll submit as soon as I receive it.

Thanks, Donna

notes about datum conversions

Datum conversions between all realizations of NAD27, NAD83, and WGS84 are not practical, or sometimes not strictly possible. Many of the issues are associated with the inability to convert between the original realization of NAD83 and more recent realizations. While error could be reduced by introducing an intermediate HARN conversion, separate transformations would have to be implemented for each state, which significantly increases the complexity of the application. Therefore datum conversions include a few built-in assumptions:

1. *Conversions between NAD27 and NAD83.* This converts between NAD27 and NAD83 (1986) using the NADCON transformation. Newer realizations of NAD83, such as NAD83 (CORS96) and NAD83(2011) can differ from NAD83(1986) by a meter or so. This conversion uses the Esri transformation NAD 1927 To NAD 1983 NADCON.

Hey,

A simplified version of material flow is Fig. 1 and Fig. 2 on Page 4. Let me know what you think as soon as you have time to look at this so I can advise them properly.

Thanks, Donna
