Re: Permit Applicability Determination  
SDR Plastics, Inc.  
Ravenswood Facility  
Jackson County, WV  
Determination No. PD15-063  
Plant ID No. 035-00005

Dear Mr. Ritchie:

It has been determined that a permit will not be required under 45CSR13 for your incorporation of polyethylene resin (PP), polypropylene resin (PE), and specialty thermoplastic polyolefin resin (TPO) into the product offering at the above referenced facility. This determination is based on information included with your permit determination form (PDF) received on August 10, 2015, which indicates that there is no anticipated increase in emissions that will exceed two (2) lbs/hr or five (5) tons/year of total Hazardous Air Pollutants (HAPs); six (6) lbs/hour and ten (10) TPY of any regulated pollutant; or, trigger a substantive requirement of any State or Federal air quality regulation.

Please bear in mind, however, that any additional changes to the proposed facility may require a permit under 45CSR13. Furthermore, pursuant to 45CSR13-5.14, records briefly describing the proposed change, the pollutants involved, the potential to emit for each pollutant increased or added shall be maintained by the owner or operator for at least two years and made available to the Director upon request.

Should you have any questions, please contact the undersigned engineer at (304) 926-0499 ext. 1258.

Sincerely,  
  
Caraline Griffith  
Permit Engineer
