Buckeye Asphalt Class I Administrative Update Description

This Class I Administrative Update consists of the following changes:

After reviewing the Buckeye Asphalt Plant Air Permit (G20-B005A), two typos were noted in the registration pages. First, in the Emissions Unit Table, Asphalt Mix Silo (S3) has a construction date of 2004. This should be 2000. Second, the Emissions Limitations table does not include CO TPY emissions from the Materials Handling, however the total for CO emissions still reflects the Materials Handling emission value of 0.51 TPY. The total CO TPY emissions should be 11.57 TPY.
