**Subject: Class I Administrative Update – G70 – A114
OXF-127 Natural Gas Production Site
EQT Production Company**

Dear Mr. Durham:

EQT Production Company is submitting this Class I Administrative Update application for the OXF-127 Natural Gas Well production Site, currently permitted under General Permit G70-A114. The application addresses equipment changes at the facility.

The changes to OXF-127 include:

- Replacing the existing twenty one (21) 210 barrel (bbl) storage tanks (S001-S021) with eight (8) 400 barrel (bbl) storage tanks; and
- Replacing the four (4) 2.31 MMBtu/hr line heaters (S034-S037) with units rated at 1.54 MMBtu/hr.

There are no changes to the throughputs or emission limits in the current general permit for the storage tanks. The line heater changes will result in a reduction of potential emissions from those in the current permit as the maximum heat input rating is less than the current permit. As such, the proposed changes qualify as a Class I administrative update.

Enclosed are two electronic copies and one original hard copy of the application. EQT Production appreciates your review of this application. Should you have any questions pertaining to this matter, please contact me at (412)-395-3699 or abosiljevac@eqt.com.

Sincerely,

A handwritten signature in blue ink, appearing to read 'RAB' or similar, with a large, sweeping flourish extending to the right.
