RE: Permit Applicability Determination  
Nobel Energy, Inc.  
Sand Hill 1 (SHL 1)  
Marshall County, WV  
Determination No. PD16-065  
Plant ID No. 051-00234

Dear RJ Moses:

It has been determined that a permit will not be required under 45CSR13 for the Sand Hill 1 (SHL 1) natural gas production facility. This determination is based on information included with your permit determination form dated October 24, 2016 and received on November 18, 2016, which indicates that the increase in emissions will not exceed two (2) lbs/hr OR five (5) tons/year of total Hazardous Air Pollutants (HAPs); six (6) lbs/hour AND ten (10) TPY of any regulated pollutant; or, trigger a substantive requirement of any State or Federal air quality regulation.

Please bear in mind, however, that any additional changes to the proposed facility may require a permit under 45CSR13. Furthermore, pursuant to 45CSR13-5.14, records briefly describing the proposed change, the pollutants involved, the potential to emit for each pollutant increased or added shall be maintained by the owner or operator for at least two years and made available to the Director upon request.

RJ Moses
