Re: Permit Applicability Determination
Dominion Transmission, Inc.
Determination No. PD16-018
Plant ID No. 103-00009

Dear Ms. Tornabene:

It has been determined that a permit will not be required under 45 CSR 13 for the proposed replacement of Tank V-3050 at the Hastings Slug Catcher Area. This determination is based on information included in your permit determination request submitted on December 14, 2015, which was logged as PD15-105 and additional information provided on February 8, 2016, which indicates that the increase in emissions will not exceed two (2) lbs/hr OR five (5) tons/year of total Hazardous Air Pollutants (HAPs); six (6) lbs/hour AND ten (10) TPY of any regulated pollutant; or, trigger a substantive requirement of any State or Federal air quality regulation.

Please bear in mind, however, that any additional changes to the proposed facility may require a permit under 45CSR13. Furthermore, pursuant to 45CSR13-5.14, records briefly describing the proposed change, the pollutants involved, the potential to emit for each pollutant increased or added shall be maintained by the owner or operator for at least two years and made available to the Director upon request.

Response to Ms. Tornabene Permit Determination Request
