Re: R13-2866B, Dominion Transmission Inc, Pepper Station

On December 24, 2015 the WVDEP-DAQ received a Class I administrative update request from Dominion Transmission Inc to correct typographical errors that existed in Permit R13-2866A.

§45-13-4 contains regulatory requirements on obtaining administrative updates to existing permits. Specifically §45-13-4.2.a outlines the requirements for Class I administrative updates. This proposed permitting action qualifies for a Class I administrative update due to the fact that there will be typographical errors corrected. There is no application fee or required legal advertisement for a Class I administrative update. These changes will result in no increase in air emissions.

The following typographical errors were changed:

1. The Maximum Design Heat Input (MDHI) for reboiler (RBV1) on page 4 of this permit has been corrected to 1.155 mmBtu/hr.
