Re: G70-A114A, EQT Production Company, OXF-127 Pad

On November 9, 2015 the WVDEP-DAQ received a Class I administrative update request from EQT Production Company to install six (6) 400-bbl proposed produced liquid tanks and remove twenty-one (21) 210-bbl tanks that existed in Permit Registration G70-A114.

§45-13-4 contains regulatory requirements on obtaining administrative updates to existing permits. Specifically §45-13-4.2.a outlines the requirements for Class I administrative updates. This proposed permitting action qualifies for a Class I administrative update due to the fact that there will no increase in emissions. There is no application fee or required legal advertisement for a Class I administrative update. These changes will result in no increase in air emissions.

The following were changed:

1. Permit Registration, page 4, first emission unit IDs changed to S040 – S045.
2. Permit Registration, page 5, section 3.0; changed to emission units S040 – S045.
3. Permit Registration, page 5, section 3.0; line heater emission limits changed to each unit.
4. Permit Registration, page 5, section 4.0; first emission unit IDs changed to S040 – S045.
