Modification to Permit R13-2391I – Area C3 – Telomer Production

Dear Mr. Durham:

Recently The Chemours Company submitted to your office a Title V permit renewal application for permit R30-10700182, section 2 of 14. To ensure consistency within the construction (Reg.13) and operating (Title V) permits, we have conducted a review of all permits, and submit this Class I permit amendment request for permit R13-2391I and for the inclusion of the revised permit terms into the Title V permit (Section 2 of 14). No significant changes are proposed, and we request that DEP make the following language changes:

1. Please replace the last sentence of the first paragraph in condition B.6 on page 5 with the following: *“The following requirements, and those additional requirements to this process found in R13-3223 will apply.”*
2. Please revise the middle column header in Table B.6 on page 5 of the permit to read: *“Equipment ID per R13-3223”* since the permit supersedes Consent Order CO-R21-97-47.
3. Please replace *“Consent Order R21-97-47”* at the top of page 6, under Table B.6. with *“Permit R13-3223.”* Also, since other provisions of CO-R21-97-47 are included in R13-3223, please remove the second sentence under Table B.6.
4. Please remove references to Emission Source IDs C3IP and C3IQ from Attachments B and C, since these sources have been removed. Additionally, references to Emission Point ID C3IQE can also be removed, since that emission point no longer exists.

If you have questions or concerns with this permit amendment request, please contact Mr. David F. Altman by telephone at (304) 863-4271 or Mr. Christopher J. Luksic by telephone at (304) 863-4450 or by email at christopher.j.luksic@chemours.com.

Sincerely,

Robert J. Fehrenbacher
Plant Manager
