Submission Date: April 24, 2015
Applicant Ad Date: Not Applicable
Applicant Ad Newspaper: Not Applicable
Complete Date: April 24, 2015
Due Date: June 23, 2015
Engineer: Joe Kessler

Description of Proposed Changes

On April 24, 2015, Williams Ohio Valley Midstream LLC (Williams) submitted a permit application for a Class 1 Administrative Update (A/U) to R13-2826H. The request was to correct the capacity of storage tank T-02 from 8,400 gallons to 8,820 gallons and revise the installation dates for storage tanks T-03 and T-04. Storage Tanks T-02 through T-25 were added after-the-fact to R13-2826H. The information as noted above was incorrectly listed in permit application R13-2826H. The R13-2826H evaluation stated that storage tank T-02 had “*deminimis* emissions.” No physical changes, changes in the method of operation, or increase in any emissions will result from these administrative changes.

Regulatory Applicability

There was no change to the regulatory applicability of any emission units as a result of this permitting action. Pursuant to DAQ guidance and interpretation, the requested changes are eligible for review and issuance as a Class I A/U under the provisions of §45-13-4.2(a)(7).

Changes to Permit R13-2826H

The substantive changes made to Permit Number R13-2826H was limited to updating the storage tank information as noted above under Table 1.0: Emissions Units.

Recommendation

I recommend the issuance of the Class 1 Administrative Update R13-2826I to Williams Ohio Valley Midstream LLC for the changes outlined above.

Joe Kessler, PE
Engineer
