COMPANY	<i>Allegheny Energy</i>
FACILITY	<i>Petersburg</i>
REGION	<i>2</i>
REG.	<i>13-3082B</i>

On December 7, 2015 the West Virginia Department of Environmental Protection, Division of Air Quality, issued permit R13-3082A to Allegheny Energy Supply Company, LLC for a Class II Administrative Update, for a coal fired power plant. On January 5, 2016, Allegheny Energy appealed certain conditions in the permit to the West Virginia Air Quality Board. On April 18, 2016, a settlement agreement and order was issued by the Air Quality Board which required WVDAQ to make certain changes to permit R13-3082A. Those changes involved the following:

- * Condition 4.1.12 was changed to increase the allowable NO_x limit from the boilers.
- * Old Condition 4.1.14 was deleted from the permit.
- * Old Condition 4.1.15 was renumbered to 4.1.14.
