

Memo to File

To: Bev McKeone
From: Mike Egnor
Date: March 8, 2016
Re: PD 16-004 • Optima Belle • Belle Plant • 039-00663

This office received a permit determination request for R13-0882H from Optima Belle January 13, 2016 and dated January 12, 2016. The determination request is the proposed addition of a Sclareol Purification Process.

The Sclareol Purification Process would have emissions from this process of 0.3112 lbs/hr and 72.84 lbs/yr of VOC's and 0.044 lbs/hr and 9.48 lbs/yr of PM, and will trigger substantive requirements (including but not limited to LDAR) under the MON MACT.

Evaluation Comments:

It is recommended that they update their R13-0882H Permit as a Class II administrative update and also update this new process in their Title V Permit renewal application.
