RE: Permit Applicability Determination
Optima Belle LLC
Belle Plant
Determination No. PD16-004
Plant ID No. 03900663

Dear Mr. Williams:

It has been determined that a Class II administrative amendment will be required under 45CSR13 for your proposed addition of a Sclareol Purification Process. This determination is based on information included with your permit determination form dated January 12, 2016 and received on January 13, 2016, which indicates that the emission from this process will be 0.3112 lbs/hr and 72.84 lbs/yr of VOC's and 0.044 lbs/hr and 9.48 lbs/yr of PM, and will trigger substantive requirements under the MON MACT. It is recommended that you update these changes in the R13-0882H Permit and Title V Permit renewal.

Please bear in mind, however, that any additional changes to the proposed facility may require a permit under 45CSR13. Furthermore, pursuant to 45CSR13-5.14, records briefly describing the proposed change, the pollutants involved, the potential to emit for each pollutant increased or added shall be maintained by the owner or operator for at least two years and made available to the Director upon request.

Should you have any questions, please contact the undersigned engineer at (304) 926-0499 ext. 1208 or michael.egnor@wv.gov.

Sincerely,

Mike Egnor
Engineer
