**RE: Permit Determination for a Private Compressed Natural Gas (CNG) Fueling Station at 3100 MacCorkle Ave. SW, Charleston, WV 25303**

To Whom It May Concern,

United Parcel Service, INC has contracted with TruStar Energy to Design/Build/Install a Compressed Natural Gas (CNG) fueling station at 3100 MacCorkle Ave. SW, Charleston, WV 25303, for their private vehicle fleet. The station consists of three electric motor driven, natural gas compressors, each capable of delivering 485 scfm (1455 scfm total) to three fast-fill dispensers, ten dual-hose time-fill dispenser posts, and six above-ground ASME storage tanks.

The Compressors will use pipeline gas provided by Mountaineer Gas. This is a closed loop system under normal operating conditions with zero emissions. The system is designed in compliance with NFPA 52 and all other relevant and/or applicable codes.

Please advise if an Air Quality Permit through the West Virginia Department of Environmental Protection will be needed for this project or if we qualify for an exemption. Feel free to contact me if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeff Lucero", with a long horizontal flourish extending to the right.
