**MEMORANDUM**

**To:** Beverly McKeone  
**From:** David Keatley  
**Date:** May 7, 2015  
**Subject:** G70-A135A

The WV DAQ received this application on April 30, 2015 and the application was deemed complete on May 7, 2015.

This proposed permitting action qualifies for a Class I administrative update due to the fact that there will be typographical errors corrected. With this application an 18.6 mmBtu/hr combustor will be removed and a 6.6 mmBtu/hr combustor will be installed. There is no application fee or required legal advertisement for a Class I administrative update. These changes will result in no increase in air emissions.

- In 1.0 Emission Units Table, the new 6.6 mmBtu/hr Cimarron combustor (EC001) has been changed.
- In 3.0 Emission Limitations, EC001; nitrogen oxides TPY has been corrected to 6.32.
