Re: Permit Applicability Determination
Bridgeport Station
Harrison County, WV
Determination No. PD16-028
Plant ID No. 033-00100

Dear Ms. Tornabene:

It has been determined that a permit will not be required under 45CSR13 for the removal of two (2) Capstone C-65 microturbines (AUX02 & AUX03) and the addition of a EPA certified natural gas emergency auxiliary generator at the above referenced facility. This determination is based on information included with your Permit Determination Form (PDF) received on March 9, 2016, which indicates that although the increase in emissions will not exceed two (2) lbs/hr or five (5) tons/year of total Hazardous Air Pollutants (HAPs); six (6) lbs/hour and ten (10) TPY of any regulated pollutant; or, trigger a substantive requirement of any State or Federal air quality regulation, there is an emissions increase. This Division recommends that the applicant complete the forms necessary for a Class II Administrative Update of Permit R13-1801G in order to incorporate the new addition / removals in the permit.

The appropriate application forms which need to be completed can be obtained from the WVDEP website at <http://www.dep.wv.gov>. Submit the completed forms, \$300.00 permit application fee, and any other applicable fees to the above address. If you should have questions concerning which forms are needed, or have trouble downloading, please call the Permitting Secretary at (304) 926-0499 Ext 1227. Please address this matter as soon as possible to ensure expediency of the permit review process.

Should you have any questions, please contact the undersigned engineer at (304) 926-0499 Ext. 1211.

Sincerely,

William T. Rothwell II, P.E.
Engineer
