MEMORANDUM

To: Beverly D. McKeone

From: Thornton E. Martin Jr., Permit Engineer

Date: May 16, 2016

Subject: Class I Administrative Update to Permit Registration (R13-3190A)

BACKGROUND

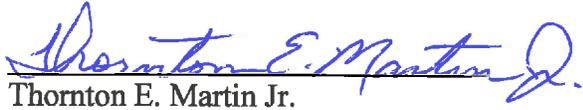

Originally, the DAQ received an after-the-fact application on May 20, 2014 to install the following emission units: seven (7) 0.5 mmBtu/hr line heaters, one (1) 210-bbl condensate tank, five (5) produced water tanks, one (1) 104.7-bhp natural gas fired generator engine, and one (1) 50-bhp natural gas fired emergency generator engine.

CURRENT REQUEST

On April 25, 2016, Stone Energy Corporation submitted a request for a Class I Administrative Update to their existing Permit R13-3190 to remove the Tradewinds Emergency Generator Engine (50 BHP, natural gas-fired reciprocating engine) (GE-02) from permit R13-3190. It was never installed at this facility. There are four (4) references to GE-02 within the permit, that will need to be addressed:

1. Modify Table in Section 1.0 Emission Units. Delete GE-02.
2. Modify Section 8.0. Source Specific Requirements (Generator Engines, GE-01 and GE-02).
3. Delete Sections 8.1.3, 8.1.4 and 8.1.5.
4. Modify Sections 8.3.1 and 8.3.2 wording to reflect the presence of a single natural

gas-fired RICE Generator.

A handwritten signature in blue ink, reading "Thornton E. Martin Jr.", written over a horizontal line.

Thornton E. Martin Jr.

Permit Engineer
