**MEMORANDUM**

To: Bev McKeone, NSR Program Manager

From: Caraline Griffith, Engineer Trainee

Date: November 18, 2015

Subject: Administrative Update, G70-A038B, Noble Energy, Inc - SHR1

On October 19, 2015 the DAQ received an administrative update request for Noble Energy, Inc. to make changes to Permit Registration G70-A038A. Attached to this memo is the letter of approval, correspondence, and updated General Permit Registration G70-A038B.

Based on 45CSR13 “Class I Administrative Updates” are limited to changes including permit conditions as necessary to allow changes in operating parameters, emission points, control equipment or any other aspect of a source which results in a decrease in emissions of any existing regulated air pollutant or any new regulated air pollutant, which is what is occurring in this permit registration. Therefore, a Class I Administrative Update is needed and it is recommended for approval.

Below are the emission calculations and decrease in emission limits calculated using manufacturer data.

Pollutant	Estimated Emissions G70-A038A	Estimated Emissions G70-A038B	Decrease in Emissions
	TPY	TPY	TPY
NOx	15.88	14.99	-0.89
CO	58.60	56.82	-1.78
VOC	48.98	46.84	-2.14
