Re: G35-A113B, Cranberry Pipeline Corporation, Rich Creek Station

On October 26, 2015 the WVDEP-DAQ received a Class I administrative update request from Cranberry Pipeline Corporation to correct typographical errors that existed in Permit G35-A113A.

§45-13-4 contains regulatory requirements on obtaining administrative updates to existing permits. Specifically §45-13-4.2.a outlines the requirements for Class I administrative updates. This proposed permitting action qualifies for a Class I administrative update due to the fact that there will only be typographical errors corrected. There is no application fee or required legal advertisement for a Class I administrative update.

1. In the permit registration, Section 14 has been unchecked and Section 13 has been checked.
2. In the permit registration, the design capacity of T05 has been changed from 1,050 gallons to 2,100 gallons.
