MEMORANDUM

To: Bev McKeone, NSR Program Manager

From: Caraline Griffith, Engineer Trainee

Date: October 19, 2015

Subject: Administrative Update, R13-2694D, Cranberry Pipeline Corporation, Heizer Station

On October 16, 2015 the DAQ received an administrative update request for Cranberry Pipeline Corporation to make changes to Permit R13-2694C. Attached to this memo are the requested changes, letter of approval, and updated General Permit R13-2694D.

Because this permit application is for the redaction of a previously permitted compressor engine (White Superior 8GTLA) and the addition of a compressor engine that was permitted before the White engine (Clark HMB-8), it was determined that a Class I Administrative Update was appropriate since the permit had already gone to notice in 2013 for the current and previous PTEs. Therefore, a Class I Administrative Update is needed and it is recommended for approval.
