MEMORANDUM

To: Beverly McKeone, P.E. – New Source Review Program Manager

From: Ed Andrews, Engineer 

Date: September 22, 2015

Subject: Class II Administrative Update of R13-2591D (R13-2591E) for Mountain State Carbon LLC (009-00002)

On August 3, 2015, the DAQ received a request from Mountain State Carbon LLC to update Permit R13-2591D. This request was filed as a Class II Administrative Update under 45 CSR 13. The application published a Class I legal ad in *The Weirton Daily Times* on August 6, 2015, and paid the Class II Filing Fee.

The application requested to replace the phrasing of “average heat content” to “nominal lower heating value” in Condition 4.1.2.a., 4.1.3.a., and 4.1.4.a. Changing of these conditions does not affect the current permitted emission limits or affect the applicability status with any existing rule or regulation.

The application requested to fix the typographic error in Condition 4.4.5. The error in this condition referred to the wrong condition, which was Condition 4.1.1.e. The correct citation should have been Condition 4.1.7., which is the tune-up requirement for the boilers.

These changes to Permit R13-2591D do not affect any emission limit or applicability of the affected source with respect to any applicable rule or regulation. Thus, the writer recommends that Mountain State Carbon LLC be issued Permit R13-2591E as requested in accordance with 45 CSR 13.
