MEMORANDUM

To: Bev McKeone, NSR Program Manager

From: Caraline Griffith, Engineer Trainee

Date: September 10, 2015

Subject: Class I Administrative Update, R13-2532G, Huntington Alloys Corporation

On September 8, 2015 the DAQ received an administrative update request for Huntington Alloys Corporation to make changes to Permit R13-2532F. The request is to change the total number of rods used per day for all seven (7) arc cutters permitted from 960 to 3360. This change is requested because 960 rods per day represents only two (2) arc cutters at 480 rods each per day. The amount of 3360 represents seven (7) arc cutters at 480 rods each per day. Attached to this memo are the completed database sheet and permit, R13-2532G.

Based on 45CSR13 "Class I Administrative Updates" are limited to changes including typographical errors, which is what is occurring in this permit registration. Therefore, a Class I Administrative Update is needed and it is recommended for approval.
