

West Virginia Department of Environmental Protection
Division of Air Quality

Earl Ray Tomblin
Governor

Randy C. Huffman
Cabinet Secretary

Permit to Operate

Pursuant to
Title V
of the Clean Air Act

Issued to:
Rain CII Carbon LLC
Moundsville Calcining Plant
R30-05100011-2014

William F. Durham
Acting Director

Issued: June 24, 2014 • Effective: July 8, 2014
Expiration: June 24, 2019 • Renewal Application Due: December 24, 2018

Permit Number: **R30-05100011-2014**
Permittee: **Rain CII Carbon LLC**
Facility Name: **Moundsville Calcining Plant**
Permittee Mailing Address: **8245 Energy Road, Moundsville, WV 26041**

This permit is issued in accordance with the West Virginia Air Pollution Control Act (West Virginia Code §§ 22-5-1 et seq.) and 45CSR30 — Requirements for Operating Permits. The permittee identified at the above-referenced facility is authorized to operate the stationary sources of air pollutants identified herein in accordance with all terms and conditions of this permit.

Facility Location: Moundsville, Marshall County, West Virginia
Telephone Number: 304-843-0245
Type of Business Entity: Corporation
Facility Description: Petroleum coke calcining
SIC Codes: 2999, 2895, 3229
UTM Coordinates: 515.30 km Easting • 4409.20 km Northing • Zone 17

Permit Writer: Bobbie Scroggie

Any person whose interest may be affected, including, but not necessarily limited to, the applicant and any person who participated in the public comment process, by a permit issued, modified or denied by the Secretary may appeal such action of the Secretary to the Air Quality Board pursuant to article one [§§ 22B-1-1 et seq.], Chapter 22B of the Code of West Virginia. West Virginia Code §22-5-14.

Issuance of this Title V Operating Permit does not supersede or invalidate any existing permits under 45CSR13, 14 or 19, although all applicable requirements from such permits governing the facility's operation and compliance have been incorporated into the Title V Operating Permit.

Table of Contents

1.0. Emission Units and Active R13, R14, and R19 Permits 3

2.0. General Conditions 9

3.0. Facility-Wide Requirements and Permit Shield 17

Source-specific Requirements

4.0. Requirements for Kiln Incinerators 23

5.0. Scrubber Stack Requirements 28

6.0. Requirements for Storage Silos and Storage Bins 30

7.0. Fines Pelletizer Requirements 32

8.0. Barge Unloading/Barge Loading Operations Requirements 34

9.0. Emergency Generator Requirements 37

ATTACHMENT A - SO₂ Monitoring Plan

ATTACHMENT B - Daily throughput of green coke into facility

ATTACHMENT C - Daily throughput of calcined coke into facility

1.0 Emission Units and Active R13, R14, and R19 Permits

1.1 Emission Units

Emission Unit ID	Emission Point ID	Emission Unit Description	Year Installed	Design Capacity	Control Device*
RK-01	S-01	Kiln 1	1956	50 TPH raw coke feed	Incinerator 1 I-01

1.2. Active R13, R14, and R19 Permits

The underlying authority for any conditions from R13, R14, and/or R19 permits contained in this operating permit is cited using the original permit number (e.g. R13-1234). The current applicable version of such permit(s) is listed below.

Permit Number	Date of Issuance
R13-0563	July 16, 1980
R13-0588	November 18, 1980
R13-0662	June 25, 1982
R13-2095R	May 27, 1997
R13-2612A	July 31, 2008

2.0. General Conditions

2.1. Definitions

- 2.1.1. All references to the "West Virginia Air Pollution Control Act" or the "Air Pollution Control Act" mean those provisions contained in W.Va. Code §§ 22-5-1 to 22-5-18.
- 2.1.2. The "Clean Air Act" means those provisions contained in 42 U.S.C. §§ 7401 to 7671q, and regulations promulgated thereunder.
- 2.1.3. "Secretary" means the Secretary of the Department of Environmental Protection or such other person to whom the Secretary has delegated authority or duties pursuant to W.Va. Code §§ 22-1-6 or 22-1-8 (45CSR§30-2.12.). The Director of the Division of Air Quality is the Secretary's designated representative for the purposes of this permit.
- 2.1.4. Unless otherwise specified in a permit condition or underlying rule or regulation, all references to a "rolling yearly total" shall mean the sum of the monthly data, values or parameters being measured, monitored, or recorded, at any given time for the previous twelve (12) consecutive calendar months

2.2. Acronyms

CAAA	Clean Air Act Amendments	NESHAPS	National Emissions Standards for Hazardous Air Pollutants
CBI	Confidential Business Information	NO_x	Nitrogen Oxides
CEM	Continuous Emission Monitor	NSPS	New Source Performance Standards
CES	Certified Emission Statement	PM	Particulate Matter
C.F.R. or CFR	Code of Federal Regulations	PM₁₀	Particulate Matter less than 10µm in diameter
CO	Carbon Monoxide	pph	Pounds per Hour
C.S.R. or CSR	Codes of State Rules	ppm	Parts per Million
DAQ	Division of Air Quality	PSD	Prevention of Significant Deterioration
DEP	Department of Environmental Protection	psi	Pounds per Square Inch
FOIA	Freedom of Information Act	SIC	Standard Industrial Classification
HAP	Hazardous Air Pollutant	SIP	State Implementation Plan
HON	Hazardous Organic NESHAP	SO₂	Sulfur Dioxide
HP	Horsepower	TAP	Toxic Air Pollutant
lbs/hr	Pounds per Hour	TPY	Tons per Year
LDAR	Leak Detection and Repair	TRS	Total Reduced Sulfur
m	Thousand	TSP	Total Suspended Particulate
MACT	Maximum Achievable Control Technology	USEPA	United States Environmental Protection Agency
mm	Million	UTM	Universal Transverse Mercator
mmBtu/hr	Million British Thermal Units per Hour	VEE	Visual Emissions Evaluation
mmft³/hr	Million Cubic Feet Burned per Hour	VOC	Volatile Organic Compounds
NA or N/A	Not Applicable		
NAAQS	National Ambient Air Quality Standards		

2.3. Permit Expiration and Renewal

- 2.3.1. Permit duration. This permit is issued for a fixed term of five (5) years and shall expire on the date specified on the cover of this permit, except as provided in 45CSR§30-6.3.b. and 45CSR§30-6.3.c.
[45CSR§30-5.1.b.]
- 2.3.2. A permit renewal application is timely if it is submitted at least six (6) months prior to the date of permit expiration.
[45CSR§30-4.1.a.3.]
- 2.3.3. Permit expiration terminates the source's right to operate unless a timely and complete renewal application has been submitted consistent with 45CSR§30-6.2. and 45CSR§30-4.1.a.3.
[45CSR§30-6.3.b.]
- 2.3.4. If the Secretary fails to take final action to deny or approve a timely and complete permit application before the end of the term of the previous permit, the permit shall not expire until the renewal permit has been issued or denied, and any permit shield granted for the permit shall continue in effect during that time.
[45CSR§30-6.3.c.]

2.4. Permit Actions

- 2.4.1. This permit may be modified, revoked, reopened and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.
[45CSR§30-5.1.f.3.]

2.5. Reopening for Cause

- 2.5.1. This permit shall be reopened and revised under any of the following circumstances:
 - a. Additional applicable requirements under the Clean Air Act or the Secretary's legislative rules become applicable to a major source with a remaining permit term of three (3) or more years. Such a reopening shall be completed not later than eighteen (18) months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended pursuant to 45CSR§§30-6.6.a.1.A. or B.
 - b. Additional requirements (including excess emissions requirements) become applicable to an affected source under Title IV of the Clean Air Act (Acid Deposition Control) or other legislative rules of the Secretary. Upon approval by U.S. EPA, excess emissions offset plans shall be incorporated into the permit.
 - c. The Secretary or U.S. EPA determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.
 - d. The Secretary or U.S. EPA determines that the permit must be revised or revoked and reissued to assure compliance with the applicable requirements.
[45CSR§30-6.6.a.]

2.6. Administrative Permit Amendments

- 2.6.1. The permittee may request an administrative permit amendment as defined in and according to the procedures specified in 45CSR§30-6.4.
[45CSR§30-6.4.]

2.7. Minor Permit Modifications

- 2.7.1. The permittee may request a minor permit modification as defined in and according to the procedures specified in 45CSR§30-6.5.a.
[45CSR§30-6.5.a.]

2.8. Significant Permit Modification

- 2.8.1. The permittee may request a significant permit modification, in accordance with 45CSR§30-6.5.b., for permit modifications that do not qualify for minor permit modifications or as administrative amendments.
[45CSR§30-6.5.b.]

2.9. Emissions Trading

- 2.9.1. No permit revision shall be required, under any approved economic incentives, marketable permits, emissions trading, and other similar programs or processes for changes that are provided for in the permit and that are in accordance with all applicable requirements.
[45CSR§30-5.1.h.]

2.10. Off-Permit Changes

- 2.10.1. Except as provided below, a facility may make any change in its operations or emissions that is not addressed nor prohibited in its permit and which is not considered to be construction nor modification under any rule promulgated by the Secretary without obtaining an amendment or modification of its permit. Such changes shall be subject to the following requirements and restrictions:
- a. The change must meet all applicable requirements and may not violate any existing permit term or condition.
 - b. The permittee must provide a written notice of the change to the Secretary and to U.S. EPA within two (2) business days following the date of the change. Such written notice shall describe each such change, including the date, any change in emissions, pollutants emitted, and any applicable requirement that would apply as a result of the change.
 - c. The change shall not qualify for the permit shield.
 - d. The permittee shall keep records describing all changes made at the source that result in emissions of regulated air pollutants, but not otherwise regulated under the permit, and the emissions resulting from those changes.
 - e. No permittee may make any change subject to any requirement under Title IV of the Clean Air Act (Acid Deposition Control) pursuant to the provisions of 45CSR§30-5.9.

- f. No permittee may make any changes which would require preconstruction review under any provision of Title I of the Clean Air Act (including 45CSR14 and 45CSR19) pursuant to the provisions of 45CSR§30-5.9.

[45CSR§30-5.9]

2.11. Operational Flexibility

- 2.11.1. The permittee may make changes within the facility as provided by § 502(b)(10) of the Clean Air Act. Such operational flexibility shall be provided in the permit in conformance with the permit application and applicable requirements. No such changes shall be a modification under any rule or any provision of Title I of the Clean Air Act (including 45CSR14 and 45CSR19) promulgated by the Secretary in accordance with Title I of the Clean Air Act and the change shall not result in a level of emissions exceeding the emissions allowable under the permit.

[45CSR§30-5.8]

- 2.11.2. Before making a change under 45CSR§30-5.8., the permittee shall provide advance written notice to the Secretary and to U.S. EPA, describing the change to be made, the date on which the change will occur, any changes in emissions, and any permit terms and conditions that are affected. The permittee shall thereafter maintain a copy of the notice with the permit, and the Secretary shall place a copy with the permit in the public file. The written notice shall be provided to the Secretary and U.S. EPA at least seven (7) days prior to the date that the change is to be made, except that this period may be shortened or eliminated as necessary for a change that must be implemented more quickly to address unanticipated conditions posing a significant health, safety, or environmental hazard. If less than seven (7) days notice is provided because of a need to respond more quickly to such unanticipated conditions, the permittee shall provide notice to the Secretary and U.S. EPA as soon as possible after learning of the need to make the change.

[45CSR§30-5.8.a.]

- 2.11.3. The permit shield shall not apply to changes made under 45CSR§30-5.8., except those provided for in 45CSR§30-5.8.d. However, the protection of the permit shield will continue to apply to operations and emissions that are not affected by the change, provided that the permittee complies with the terms and conditions of the permit applicable to such operations and emissions. The permit shield may be reinstated for emissions and operations affected by the change:

- a. If subsequent changes cause the facility's operations and emissions to revert to those authorized in the permit and the permittee resumes compliance with the terms and conditions of the permit, or
- b. If the permittee obtains final approval of a significant modification to the permit to incorporate the change in the permit.

[45CSR§30-5.8.c.]

- 2.11.4. "Section 502(b)(10) changes" are changes that contravene an express permit term. Such changes do not include changes that would violate applicable requirements or contravene enforceable permit terms and conditions that are monitoring (including test methods), recordkeeping, reporting, or compliance certification requirements.

[45CSR§30-2.39]

2.12. Reasonably Anticipated Operating Scenarios

- 2.12.1. The following are terms and conditions for reasonably anticipated operating scenarios identified in this permit.

- a. Contemporaneously with making a change from one operating scenario to another, the permittee shall record in a log at the permitted facility a record of the scenario under which it is operating and to document the change in reports submitted pursuant to the terms of this permit and 45CSR30.
- b. The permit shield shall extend to all terms and conditions under each such operating scenario; and
- c. The terms and conditions of each such alternative scenario shall meet all applicable requirements and the requirements of 45CSR30.
[45CSR§30-5.1.i.]

2.13. Duty to Comply

- 2.13.1. The permittee must comply with all conditions of this permit. Any permit noncompliance constitutes a violation of the West Virginia Code and the Clean Air Act and is grounds for enforcement action by the Secretary or USEPA; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.
[45CSR§30-5.1.f.1.]

2.14. Inspection and Entry

- 2.14.1. The permittee shall allow any authorized representative of the Secretary, upon the presentation of credentials and other documents as may be required by law, to perform the following:
 - a. At all reasonable times (including all times in which the facility is in operation) enter upon the permittee's premises where a source is located or emissions related activity is conducted, or where records must be kept under the conditions of this permit;
 - b. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;
 - c. Inspect at reasonable times (including all times in which the facility is in operation) any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit;
 - d. Sample or monitor at reasonable times substances or parameters to determine compliance with the permit or applicable requirements or ascertain the amounts and types of air pollutants discharged.
[45CSR§30-5.3.b.]

2.15. Schedule of Compliance

- 2.15.1. For sources subject to a compliance schedule, certified progress reports shall be submitted consistent with the applicable schedule of compliance set forth in this permit and 45CSR§30-4.3.h., but at least every six (6) months, and no greater than once a month, and shall include the following:
 - a. Dates for achieving the activities, milestones, or compliance required in the schedule of compliance, and dates when such activities, milestones or compliance were achieved; and

- b. An explanation of why any dates in the schedule of compliance were not or will not be met, and any preventative or corrective measure adopted.
[45CSR§30-5.3.d.]

2.16. Need to Halt or Reduce Activity not a Defense

- 2.16.1. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit. However, nothing in this paragraph shall be construed as precluding consideration of a need to halt or reduce activity as a mitigating factor in determining penalties for noncompliance if the health, safety, or environmental impacts of halting or reducing operations would be more serious than the impacts of continued operations.
[45CSR§30-5.1.f.2.]

2.17. Emergency

- 2.17.1. An "emergency" means any situation arising from sudden and reasonably unforeseeable events beyond the control of the source, including acts of God, which situation requires immediate corrective action to restore normal operation, and that causes the source to exceed a technology-based emission limitation under the permit, due to unavoidable increases in emissions attributable to the emergency. An emergency shall not include noncompliance to the extent caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error.
[45CSR§30-5.7.a.]
- 2.17.2. Effect of any emergency. An emergency constitutes an affirmative defense to an action brought for noncompliance with such technology-based emission limitations if the conditions of 45CSR§30-5.7.c. are met.
[45CSR§30-5.7.b.]
- 2.17.3. The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence that:
 - a. An emergency occurred and that the permittee can identify the cause(s) of the emergency;
 - b. The permitted facility was at the time being properly operated;
 - c. During the period of the emergency the permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and
 - d. Subject to the requirements of 45CSR§30-5.1.c.3.C.1, the permittee submitted notice of the emergency to the Secretary within one (1) working day of the time when emission limitations were exceeded due to the emergency and made a request for variance, and as applicable rules provide. This notice, report, and variance request fulfills the requirement of 45CSR§30-5.1.c.3.B. This notice must contain a detailed description of the emergency, any steps taken to mitigate emissions, and corrective actions taken.
[45CSR§30-5.7.c.]
- 2.17.4. In any enforcement proceeding, the permittee seeking to establish the occurrence of an emergency has the burden of proof.
[45CSR§30-5.7.d.]

- 2.17.5. This provision is in addition to any emergency or upset provision contained in any applicable requirement.
[45CSR§30-5.7.e.]

2.18. Federally-Enforceable Requirements

- 2.18.1. All terms and conditions in this permit, including any provisions designed to limit a source's potential to emit and excepting those provisions that are specifically designated in the permit as "State-enforceable only", are enforceable by the Secretary, USEPA, and citizens under the Clean Air Act.
[45CSR§30-5.2.a.]
- 2.18.2. Those provisions specifically designated in the permit as "State-enforceable only" shall become "Federally-enforceable" requirements upon SIP approval by the USEPA.

2.19. Duty to Provide Information

- 2.19.1. The permittee shall furnish to the Secretary within a reasonable time any information the Secretary may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the Secretary copies of records required to be kept by the permittee. For information claimed to be confidential, the permittee shall furnish such records to the Secretary along with a claim of confidentiality in accordance with 45CSR31. If confidential information is to be sent to USEPA, the permittee shall directly provide such information to USEPA along with a claim of confidentiality in accordance with 40 C.F.R. Part 2.
[45CSR§30-5.1.f.5.]

2.20. Duty to Supplement and Correct Information

- 2.20.1. Upon becoming aware of a failure to submit any relevant facts or a submittal of incorrect information in any permit application, the permittee shall promptly submit to the Secretary such supplemental facts or corrected information.
[45CSR§30-4.2.]

2.21. Permit Shield

- 2.21.1. Compliance with the conditions of this permit shall be deemed compliance with any applicable requirements as of the date of permit issuance provided that such applicable requirements are included and are specifically identified in this permit or the Secretary has determined that other requirements specifically identified are not applicable to the source and this permit includes such a determination or a concise summary thereof.
[45CSR§30-5.6.a.]
- 2.21.2. Nothing in this permit shall alter or affect the following:
- a. The liability of an owner or operator of a source for any violation of applicable requirements prior to or at the time of permit issuance; or
 - b. The applicable requirements of the Code of West Virginia and Title IV of the Clean Air Act (Acid Deposition Control), consistent with § 408 (a) of the Clean Air Act.

- c. The authority of the Administrator of U.S. EPA to require information under § 114 of the Clean Air Act or to issue emergency orders under § 303 of the Clean Air Act.
[45CSR§30-5.6.c.]

2.22. Credible Evidence

- 2.22.1. Nothing in this permit shall alter or affect the ability of any person to establish compliance with, or a violation of, any applicable requirement through the use of credible evidence to the extent authorized by law. Nothing in this permit shall be construed to waive any defenses otherwise available to the permittee including but not limited to any challenge to the credible evidence rule in the context of any future proceeding.
[45CSR§30-5.3.e.3.B. and 45CSR38]

2.23. Severability

- 2.23.1. The provisions of this permit are severable. If any provision of this permit, or the application of any provision of this permit to any circumstance is held invalid by a court of competent jurisdiction, the remaining permit terms and conditions or their application to other circumstances shall remain in full force and effect.
[45CSR§30-5.1.e.]

2.24. Property Rights

- 2.24.1. This permit does not convey any property rights of any sort or any exclusive privilege.
[45CSR§30-5.1.f.4]

2.25. Acid Deposition Control

- 2.25.1. Emissions shall not exceed any allowances that the source lawfully holds under Title IV of the Clean Air Act (Acid Deposition Control) or rules of the Secretary promulgated thereunder.
 - a. No permit revision shall be required for increases in emissions that are authorized by allowances acquired pursuant to the acid deposition control program, provided that such increases do not require a permit revision under any other applicable requirement.
 - b. No limit shall be placed on the number of allowances held by the source. The source may not, however, use allowances as a defense to noncompliance with any other applicable requirement.
 - c. Any such allowance shall be accounted for according to the procedures established in rules promulgated under Title IV of the Clean Air Act.
[45CSR§30-5.1.d.]
- 2.25.2. Where applicable requirements of the Clean Air Act are more stringent than any applicable requirement of regulations promulgated under Title IV of the Clean Air Act (Acid Deposition Control), both provisions shall be incorporated into the permit and shall be enforceable by the Secretary and U. S. EPA.
[45CSR§30-5.1.a.2.]

3.0. Facility-Wide Requirements

3.1. Limitations and Standards

- 3.1.1. **Open burning.** The open burning of refuse by any person is prohibited except as noted in 45CSR§6-3.1.
[45CSR§6-3.1.]
- 3.1.2. **Open burning exemptions.** The exemptions listed in 45CSR§6-3.1 are subject to the following stipulation: Upon notification by the Secretary, no person shall cause or allow any form of open burning during existing or predicted periods of atmospheric stagnation. Notification shall be made by such means as the Secretary may deem necessary and feasible.
[45CSR§6-3.2.]
- 3.1.3. **Asbestos.** The permittee is responsible for thoroughly inspecting the facility, or part of the facility, prior to commencement of demolition or renovation for the presence of asbestos and complying with 40 C.F.R. § 61.145, 40 C.F.R. § 61.148, and 40 C.F.R. § 61.150. The permittee must notify the Secretary at least ten (10) working days prior to the commencement of any asbestos removal on the forms prescribed by the Secretary if the permittee is subject to the notification requirements of 40 C.F.R. § 61.145(b)(3)(i). The USEPA, the Division of Waste Management and the Bureau for Public Health - Environmental Health require a copy of this notice to be sent to them.
[40 C.F.R. 61 and 45CSR34]
- 3.1.4. **Odor.** No person shall cause, suffer, allow or permit the discharge of air pollutants which cause or contribute to an objectionable odor at any location occupied by the public.
[45CSR§4-3.1 State-Enforceable only.]
- 3.1.5. **Standby plan for reducing emissions.** When requested by the Secretary, the permittee shall prepare standby plans for reducing the emissions of air pollutants in accordance with the objectives set forth in Tables I, II, and III of 45CSR11.
[45CSR§11-5.2]
- 3.1.6. **Emission inventory.** The permittee is responsible for submitting, on an annual basis, an emission inventory in accordance with the submittal requirements of the Division of Air Quality.
[W.Va. Code § 22-5-4(a)(14)]
- 3.1.7. **Ozone-depleting substances.** For those facilities performing maintenance, service, repair or disposal of appliances, the permittee shall comply with the standards for recycling and emissions reduction pursuant to 40 C.F.R. Part 82, Subpart F, except as provided for Motor Vehicle Air Conditioners (MVACs) in Subpart B:
- a. Persons opening appliances for maintenance, service, repair, or disposal must comply with the prohibitions and required practices pursuant to 40 C.F.R. §§ 82.154 and 82.156.
 - b. Equipment used during the maintenance, service, repair, or disposal of appliances must comply with the standards for recycling and recovery equipment pursuant to 40 C.F.R. § 82.158.
 - c. Persons performing maintenance, service, repair, or disposal of appliances must be certified by an approved technician certification program pursuant to 40 C.F.R. § 82.161.
- [40 C.F.R. 82, Subpart F]

- 3.1.8. **Risk Management Plan.** This stationary source, as defined in 40 C.F.R. § 68.3, is subject to Part 68. This stationary source shall submit a risk management plan (RMP) by the date specified in 40 C.F.R. § 68.10. This stationary source shall certify compliance with the requirements of Part 68 as part of the annual compliance certification as required by 40 C.F.R. Part 70 or 71.
[40 C.F.R. 68]
- 3.1.9. The owner or operator of a plant shall maintain particulate matter control of the plant premises, and plant owned, leased or controlled access roads, by paving, application of asphalt, chemical dust suppressants or other suitable dust control measures. Good operating practices shall be implemented and when necessary particulate matter suppressants shall be applied in relation to stockpiling and general material handling to minimize particulate matter generation and atmospheric entrainment.
[45CSR§7-5.2. and 45CSR13 - R13-2095, Condition B.3.]
- 3.1.10. No person shall cause, suffer, allow or permit emission of smoke and/or particulate matter into the open air from any process source operation which is greater than twenty (20) percent opacity, except that these provisions shall not apply to smoke and/or particulate matter emitted from any process source operation which is less than forty (40) percent opacity for any period or periods aggregating no more than five (5) minutes in any sixty (60) minute period.
[45CSR§§7-3.1. and 3.2.]

3.2. Monitoring Requirements

- 3.2.1. The permittee shall maintain records indicating the use of any dust suppressants or any other suitable dust control measures applied at the facility. The permittee shall also inspect all fugitive dust control systems to ensure that they are operated and maintained in conformance with their designs. The permittee shall maintain records of all scheduled and non-scheduled maintenance. These records shall state any maintenance or corrective actions taken as a result of the inspections, and the times the fugitive dust control system(s) are inoperable and any corrective actions taken.
[45CSR§30-5.1.c.]
- 3.2.2. Visual emission checks shall be conducted monthly. For the purpose of these checks, excess visible emissions are to include visible fugitive dust emissions that leave the plant site boundaries. These checks shall be conducted during periods of facility operation for a sufficient time interval to determine if the unit has visible emissions using procedures outlined in 40 CFR 60, Appendix A, Method 22. If sources of visible emissions are identified during the survey, or at any other time, permittee shall conduct an evaluation as outlined in 45CSR§7A-2.1.a,b within three (3) days unless the permittee can demonstrate a valid reason that the time frame should be extended. A 45CSR§7A-2.1.a,b evaluation shall not be required if the visible emission condition is corrected in a timely manner and the units are operated at normal operating conditions. A record of each visible emission check required above shall be maintained on site stating the date and time of each emission check, the visible emissions survey results and, if appropriate, all corrective actions taken.
[45CSR§30-5.1.c.]

3.3. Testing Requirements

- 3.3.1. **Stack testing.** As per provisions set forth in this permit or as otherwise required by the Secretary, in accordance with the West Virginia Code, underlying regulations, permits and orders, the permittee shall conduct test(s) to determine compliance with the emission limitations set forth in this permit and/or established or set forth in underlying documents. The Secretary, or his duly authorized representative, may at his option witness or conduct such test(s). Should the Secretary exercise his option to conduct such test(s), the operator shall

provide all necessary sampling connections and sampling ports to be located in such manner as the Secretary may require, power for test equipment and the required safety equipment, such as scaffolding, railings and ladders, to comply with generally accepted good safety practices. Such tests shall be conducted in accordance with the methods and procedures set forth in this permit or as otherwise approved or specified by the Secretary in accordance with the following:

- a. The Secretary may on a source-specific basis approve or specify additional testing or alternative testing to the test methods specified in the permit for demonstrating compliance with 40 C.F.R. Parts 60, 61, and 63, if applicable, in accordance with the Secretary's delegated authority and any established equivalency determination methods which are applicable.
- b. The Secretary may on a source-specific basis approve or specify additional testing or alternative testing to the test methods specified in the permit for demonstrating compliance with applicable requirements which do not involve federal delegation. In specifying or approving such alternative testing to the test methods, the Secretary, to the extent possible, shall utilize the same equivalency criteria as would be used in approving such changes under Section 3.3.1.a. of this permit.
- c. All periodic tests to determine mass emission limits from or air pollutant concentrations in discharge stacks and such other tests as specified in this permit shall be conducted in accordance with an approved test protocol. Unless previously approved, such protocols shall be submitted to the Secretary in writing at least thirty (30) days prior to any testing and shall contain the information set forth by the Secretary. In addition, the permittee shall notify the Secretary at least fifteen (15) days prior to any testing so the Secretary may have the opportunity to observe such tests. This notification shall include the actual date and time during which the test will be conducted and, if appropriate, verification that the tests will fully conform to a referenced protocol previously approved by the Secretary.
- d. The permittee shall submit a report of the results of the stack test within 60 days of completion of the test. The test report shall provide the information necessary to document the objectives of the test and to determine whether proper procedures were used to accomplish these objectives. The report shall include the following: the certification described in paragraph 3.5.1; a statement of compliance status, also signed by a responsible official; and, a summary of conditions which form the basis for the compliance status evaluation. The summary of conditions shall include the following:
 1. The permit or rule evaluated, with the citation number and language.
 2. The result of the test for each permit or rule condition.
 3. A statement of compliance or non-compliance with each permit or rule condition.

[WV Code § 22-5-4(a)(14-15) and 45CSR13]

3.4. Recordkeeping Requirements

- 3.4.1. **Monitoring information.** The permittee shall keep records of monitoring information that include the following:
 - a. The date, place as defined in this permit and time of sampling or measurements;
 - b. The date(s) analyses were performed;

- c. The company or entity that performed the analyses;
 - d. The analytical techniques or methods used;
 - e. The results of the analyses; and
 - f. The operating conditions existing at the time of sampling or measurement.
- [45CSR§30-5.1.c.2.A.]**

3.4.2. **Retention of records.** The permittee shall retain records of all required monitoring data and support information for a period of at least five (5) years from the date of monitoring sample, measurement, report, application, or record creation date. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the permit. Where appropriate, records may be maintained in computerized form in lieu of the above records.

[45CSR§30-5.1.c.2.B.]

3.4.3. **Odors.** For the purposes of 45CSR4, the permittee shall maintain a record of all odor complaints received, any investigation performed in response to such a complaint, and any responsive action(s) taken.

[45CSR§30-5.1.c. State-Enforceable only.]

3.5. Reporting Requirements

3.5.1. **Responsible official.** Any application form, report, or compliance certification required by this permit to be submitted to the DAQ and/or USEPA shall contain a certification by the responsible official that states that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate and complete.

[45CSR§30-4.4. and 5.1.c.3.D.]

3.5.2. A permittee may request confidential treatment for the submission of reporting required under 45CSR§30-5.1.c.3. pursuant to the limitations and procedures of W.Va. Code § 22-5-10 and 45CSR31.

[45CSR§30-5.1.c.3.E.]

3.5.3. Except for the electronic submittal of the annual certification to the USEPA as required in 3.5.5 below, all notices, requests, demands, submissions and other communications required or permitted to be made to the Secretary of DEP and/or USEPA shall be made in writing and shall be deemed to have been duly given when delivered by hand, mailed first class, or by private carrier with postage prepaid to the address(es) set forth below or to such other person or address as the Secretary of the Department of Environmental Protection may designate:

If to the DAQ:

Director
WVDEP
Division of Air Quality
601 57th Street SE
Charleston, WV 25304
Phone: 304/926-0475
FAX: 304/926-0478

If to the US EPA:

Associate Director
Office of Air Enforcement and Compliance
Assistance (3AP20)
U. S. Environmental Protection Agency
Region III
1650 Arch Street
Philadelphia, PA 19103-2029

- 3.5.4. **Certified emissions statement.** The permittee shall submit a certified emissions statement and pay fees on an annual basis in accordance with the submittal requirements of the Division of Air Quality.
[45CSR§30-8.]
- 3.5.5. **Compliance certification.** The permittee shall certify compliance with the conditions of this permit on the forms provided by the DAQ. In addition to the annual compliance certification, the permittee may be required to submit certifications more frequently under an applicable requirement of this permit. The annual certification shall be submitted to the DAQ and USEPA on or before March 15 of each year, and shall certify compliance for the period ending December 31. The annual certification to the USEPA shall be submitted in electronic format only. It shall be submitted by e-mail to the following address: R3_APD_Permits@epa.gov. The permittee shall maintain a copy of the certification on site for five (5) years from submittal of the certification.
[45CSR§30-5.3.e.]
- 3.5.6. **Semi-annual monitoring reports.** The permittee shall submit reports of any required monitoring on or before September 15 for the reporting period January 1 to June 30 and on or before March 15 for the reporting period July 1 to December 31. All instances of deviation from permit requirements must be clearly identified in such reports. All required reports must be certified by a responsible official consistent with 45CSR§30-4.4.
[45CSR§30-5.1.c.3.A.]
- 3.5.7. **Emergencies.** For reporting emergency situations, refer to Section 2.17 of this permit.
- 3.5.8. **Deviations.**
- a. In addition to monitoring reports required by this permit, the permittee shall promptly submit supplemental reports and notices in accordance with the following:
1. Any deviation resulting from an emergency or upset condition, as defined in 45CSR§30-5.7., shall be reported by telephone or telefax within one (1) working day of the date on which the permittee becomes aware of the deviation, if the permittee desires to assert the affirmative defense in accordance with 45CSR§30-5.7. A written report of such deviation, which shall include the probable cause of such deviations, and any corrective actions or preventative measures taken, shall be submitted and certified by a responsible official within ten (10) days of the deviation.
 2. Any deviation that poses an imminent and substantial danger to public health, safety, or the environment shall be reported to the Secretary immediately by telephone or telefax. A written report of such deviation, which shall include the probable cause of such deviation, and any corrective actions or preventative measures taken, shall be submitted by the responsible official within ten (10) days of the deviation.
 3. Deviations for which more frequent reporting is required under this permit shall be reported on the more frequent basis.
 4. All reports of deviations shall identify the probable cause of the deviation and any corrective actions or preventative measures taken.
[45CSR§30-5.1.c.3.C.]

- b. The permittee shall, in the reporting of deviations from permit requirements, including those attributable to upset conditions as defined in this permit, report the probable cause of such deviations and any corrective actions or preventive measures taken in accordance with any rules of the Secretary.
[45CSR§30-5.1.c.3.B.]

- 3.5.9. **New applicable requirements.** If any applicable requirement is promulgated during the term of this permit, the permittee will meet such requirements on a timely basis, or in accordance with a more detailed schedule if required by the applicable requirement.
[45CSR§30-4.3.h.1.B.]

3.6. Compliance Plan

- 3.6.1. None.

3.7. Permit Shield

- 3.7.1. The permittee is hereby granted a permit shield in accordance with 45CSR§30-5.6. The permit shield applies provided the permittee operates in accordance with the information contained within this permit.
- 3.7.2. The following requirements specifically identified are not applicable to the source based on the determinations set forth below. The permit shield shall apply to the following requirements provided the conditions of the determinations are met.
 - a. 45CSR2 does not apply because this facility does not have a fuel burning unit.
 - b. 45CSR5 does not apply because this facility is not a coal prep plant.
 - c. 40 CFR Part 60, Subpart Dc does not apply because this facility does not have steam generating units.
 - d. 40 CFR 64 - Compliance Assurance Monitoring. This is the second permit renewal for this facility. CAM was found not to be applicable to this facility at the time of the first renewal. Therefore, a CAM determination is not required.

4.0. Requirements for Kiln incinerators (afterburners I-01, I-02) and their associated stacks (S-01, S-02)

4.1. Limitations and Standards

- 4.1.1. Emission of Visible Particulate Matter - No person shall cause or allow emission of smoke into the atmosphere from any incinerator which is twenty (20%) percent opacity or greater.
[45CSR§6-4.3. and 45CSR13 - R13-2612, Condition 4.1.7.]
- 4.1.2. The provisions of Section 4.1.1. of this permit shall not apply to smoke which is less than forty (40%) percent opacity, for a period or periods aggregating no more than eight (8) minutes per start-up.
[45CSR§6-4.4. and 45CSR13 - R13-2612, Condition 4.1.8.]
- 4.1.3. No person shall cause or allow the emission of particles of unburned or partially burned refuse or ash from any incinerator which are large enough to be individually distinguished in the open air.
[45CSR§6-4.5.]
- 4.1.4. Incinerators, including all associated equipment and grounds, shall be designed, operated and maintained so as to prevent the emission of objectionable odors.
[45CSR§6-4.6. and 45CSR13 - R13-2612, Condition 4.1.9.]
- 4.1.5. The provisions of 45CSR§§7-4.1, 4.4 and 4.8 shall not apply to petroleum coke calcining kilns in existence on April 1, 1982, provided that particulate matter vented into the open air from each kiln, measured in pounds per hour, shall not exceed the amounts as determined by the following formulas:
- a. When manufacturing regular (amorphous) coke: $E = 3.64P^{0.67}$
Where E = allowable emission rate and P = the process weight rate in tons per hour, provided, however, that no kiln manufacturing regular (amorphous) coke shall exceed a maximum emission rate of fifty (50) pounds per hour. Compliance with this emission limit shall demonstrate compliance with the emission limit from Section 4.1.6. of this permit.
- b. When manufacturing graphite (crystalline) coke: $E = 16.89P^{0.67}$
Where E = allowable emission rate in pounds per hour, and P = process weight rate in tons per hour, provided, however, that no kiln manufacturing graphite (crystalline) coke shall exceed a maximum emissions rate of 200 pounds per hour.
Compliance with these emission limits demonstrates compliance with 45CSR§6-4.1. and 45CSR13 - R13-2612, Condition 4.1.6.
[45CSR§§7-4.11. a. and b., 45CSR§6-4.1. and 45CSR13 - R13-2612, Conditions 4.1.6. and 4.1.10.a. & b.]
- 4.1.6. Particulate Matter emissions for the stacks from each kiln (Emission Point IDs S-01 and S-02), shall not exceed the following:
- a. When manufacturing regular (amorphous) coke - 50 pounds per hour and 219 tons per year.
b. When manufacturing shot coke - 200 pounds per hour and 876 tons per year.

Compliance with the annual emission limits shall be determined using rolling yearly totals. A rolling yearly total shall mean the sum of the emissions at any given time for the previous twelve (12) consecutive months.
[45CSR13 - R13-2612, Condition 4.1.1.]

- 4.1.7. Emissions from the stacks from each kiln (Emission Point IDs S-01 and S-02) shall be vented to and controlled by an incinerator (afterburner) (Control Device IDs I-01 and I-02) prior to release to the atmosphere. Each kiln is equipped with an incinerator (Control Device IDs I-01 and I-02) operating at a temperature of not less than 1600° F (as averaged on a rolling three hour basis) and having a combustion chamber residence time of twelve (12) seconds or longer when calcining regular coke and twenty-four (24) seconds or longer when calcining graphite coke. Only one (1) kiln shall calcine shot or graphite coke at any time.
[45CSR§7-4.11.c. and 45CSR13 - R13-2612, Conditions 4.1.2. and 4.1.10.c.]
- 4.1.8. Any stack serving any process source operation or air pollution control equipment on any process source operation shall contain flow straightening devices or a vertical run of sufficient length to establish flow patterns consistent with acceptable stack sampling procedures.
[45CSR§7-4.12.]
- 4.1.9. No person shall cause, suffer, allow or permit any manufacturing process generating fugitive particulate matter to operate that is not equipped with a system, which may include, but not be limited to, process equipment design, control equipment design or operation and maintenance procedures, to minimize the emissions of fugitive particulate matter. To minimize means such system shall be installed, maintained and operated to ensure the lowest fugitive particulate matter emissions reasonably achievable.
[45CSR§7-5.1.]
- 4.1.10. The maximum throughput of amorphous coke to either of the kilns shall not exceed 50 tons/hour.
[45CSR13 - R13-2612, Condition 4.1.3.]
- 4.1.11. The maximum throughput of shot coke to either of the kilns shall not exceed 50 tons/hour.
[45CSR13 - R13-2612, Condition 4.1.4.]
- 4.1.12. Coke supplier changes must follow the testing schedule outlined in 4.3.3. However, if "spot shipments" of coke are necessary, the permittee must notify the Director within fifteen (15) days of receiving the "spot shipment". If it will be necessary to process the coke received in the "spot shipment" for more than sixty (60) days, then this will be considered a coke supplier change, and the testing schedule outlined in 4.3.3. must be adhered to.
[45CSR13 - R13-2612, Condition 4.1.5.]
- 4.1.13. SO₂ emissions from each kiln (S-01 and S-02) shall not exceed 2000 parts per million by volume.
[45CSR§10-4.1. and 45CSR13 - R13-2612, Condition 4.1.11.]
- 4.1.14. **Operation and Maintenance of Air Pollution Control Equipment.** The permittee shall, to the extent practicable, install, maintain, and operate the incinerators (I-01 and I-02) and associated monitoring equipment in a manner consistent with safety and good air pollution control practices for minimizing emissions, or comply with any more stringent limits set forth in this permit or as set forth by any State rule, Federal regulation, or alternative control plan approved by the Secretary.
[45CSR§13-5.11. and 45CSR13 - R13-2162, Condition 4.1.14.]

4.2. Monitoring Requirements

- 4.2.1. For the purpose of determining compliance with the opacity limits set forth in Sections 4.1.1. and 4.1.2. of this permit, the permittee shall conduct visible emission checks and/or opacity monitoring and recordkeeping for all emission sources subject to an opacity limit.

The visible emission check shall determine the presence or absence of visible emissions. At a minimum, the observer must be trained and knowledgeable regarding the effects of background contrast, ambient lighting, observer position relative to lighting, wind, and the presence of uncombined water (condensing water vapor) on the visibility of emissions. This training may be obtained from written materials found in the References 1 and 2 from 40CFR60, Appendix A, Method 22 or from the lecture portion of the 40CFR60, Appendix A, Method 9 certification course.

Visible emission checks shall be conducted at least once per calendar month with a maximum of forty-five (45) days between consecutive readings. These checks shall be performed at stacks S-01 and S-02, for a sufficient time interval, but no less than one (1) minute, to determine if any visible emissions are present. Visible emission checks shall be performed during periods of normal facility operation and appropriate weather conditions.

If visible emissions are identified at stacks S-01 and S-02 during the monthly survey, or at any other time, the permittee shall conduct an opacity evaluation as outlined in 45CSR7A or Method 9 within three (3) days, unless an extension is granted by the Director. An opacity evaluation shall not be required if the visible emission condition is corrected within three (3) days after the visible emission was identified and the units are operated at normal operating conditions. A record of each visible emissions check or opacity evaluation required above shall be maintained on site for a period of no less than five (5) years stating the date and time of each visible emission or opacity check, the visible emissions or opacity survey results and, if appropriate, all corrective actions taken.

[45CSR13 - R13-2612, Conditions 4.2.1., 4.2.2., 4.2.3., and 4.2.4.]

- 4.2.2. Compliance with the SO₂ limits for these stacks shall be demonstrated by following the revised Rule 10 Monitoring Plan, submitted on January 10, 2012. (See Attachment A)

[45CSR§10-8.2.c]

- 4.2.3. Continual compliance with PM emission limits shall be demonstrated by maintaining the temperature of the incinerator Zone 2 at or above 1600° F, except during the first 16 hours of feed introduction after a shutdown. The temperature reading of Zone 3 shall be monitored in the event that the Zone 2 temperature indication is lost for any reason, in which case the temperature of Zone 3 shall be maintained at or above 1600° F.

[45CSR§30-5.1.c.]

4.3. Testing Requirements

- 4.3.1. Testing once per permit term or at the request of the Director shall be performed to demonstrate compliance with the weight based PM emission limits.

[45CSR§7-8.1. and 45CSR§30-5.1.c.]

- 4.3.2. To determine compliance with mass emission limits for particulate matter set forth under Section 4.1.6. of this permit, the permittee shall conduct tests at any such time as may be required by the USEPA Administrator or the Director. The results of these tests are to be forwarded to the Director within 60 days of completion of the test. These records shall be certified by a "responsible official" and maintained on site for a period of not less than five (5) years and shall be made available to the Director or a duly authorized representative of the Director upon request.

[45CSR13 - R13-2612, Condition 4.3.1.]

- 4.3.3. To determine compliance with mass emission limits for particulate matter set forth under Section 4.1.6. of this permit, in the event of a coke supplier change, the permittee shall conduct tests within one hundred eighty (180)

days after coke supplier change. The results of these tests are to be forwarded to the Director within 60 days of completion of the test. These records shall be certified by a "responsible official" and maintained on site for a period of not less than five (5) years and shall be made available to the Director or a duly authorized representative of the Director upon request.

[45CSR13 - R13-2612, Condition 4.3.2.]

4.4. Recordkeeping Requirements

4.4.1. **Record of Maintenance of Air Pollution Control Equipment.** For the incinerators (I-01 and I-02), the permittee shall maintain accurate records of all required pollution control equipment inspection and/or preventative maintenance procedures.

[45CSR13 - R13-2612, Condition 4.4.2.]

4.4.2. **Record of Malfunctions of Air Pollution Control Equipment.** For the incinerators (I-01 and I-02), the permittee shall maintain records of the occurrence and duration of any malfunction or operational shutdown of the air pollution control equipment during which excess emissions occur. For each such case, the following information shall be recorded:

- a. The equipment involved.
- b. Steps taken to minimize emissions during the event.
- c. The duration of the event.
- d. The estimated increase in emissions during the event.

For each such case associated with an equipment malfunction, the additional information shall also be recorded:

- e. The cause of the malfunction.
- f. Steps taken to correct the malfunction.
- g. Any changes or modifications to equipment or procedures that would help prevent future recurrences of the malfunction.

[45CSR13 - R13-2612, Condition 4.4.3.]

4.4.3. For the purpose of demonstrating compliance with the incinerator operations, and coke throughput (amorphous coke and shot coke) to the kilns (RK-01 and RK-02), set forth in Sections 4.1.7., 4.1.10., and 4.1.11. of this permit, the permittee shall maintain accurate records of the incinerator operation, and coke throughput (amorphous coke and shot coke) to the kilns (RK-01 and RK-02). Said records shall be maintained on site for a period of five (5) years. Said records shall be made available to the Director of the Division of Air Quality or his/her duly authorized representative upon request and shall be certified by a responsible official upon the submittal.

[45CSR13 - R13-2612, Condition 4.4.4.]

4.4.4. The permittee shall maintain records of all monitoring data required by Section 4.2.1. of this permit, documenting the date and time of each visible emission check, the emission point or equipment/source identification number, the name or means of identification of the observer, the results of the check(s), whether the visible emissions are normal for the process, and, if applicable, all corrective measures taken or planned.

The permittee shall also record the general weather conditions (i.e. sunny, approximately 80° F, 6-10 mph NE wind) during the visual emission check(s). Should a visible emission observation be required to be performed per the requirements specified in 45CSR7A or Method 9, the data records of each observation shall be maintained per the requirements of 45CSR7A or Method 9. For an emission unit out of service during the normal monthly evaluation, the record of observation may note "out of service" (O/S) or equivalent.

[45CSR13 - R13-2612, Condition 4.4.5.]

4.4.5. The Permittee shall keep records of each test for weight based particulate matter emissions.

[45CSR§30-5.1.c.]

4.4.6. The temperature of the incinerator (Zone 2 as primary temperature reading and Zone 3 as the alternative, in accordance with Section 4.2.3. of this permit) shall be monitored and recorded with a computerized system.

[45CSR§30-5.1.c.]

4.5. Reporting Requirements

4.5.1. None.

4.6. Compliance Plan

4.6.1. None.

5.0. Requirements for Scrubber stack [S-06]

5.1. Limitations and Standards

- 5.1.1. No person shall cause, suffer, allow or permit emission of smoke and/or particulate matter into the open air from any process source operation which is greater than twenty (20) percent opacity, except as noted in Section 5.1.2. of this permit.
[45CSR§7-3.1.]
- 5.1.2. The provisions of Section 5.1.1. shall not apply to smoke and/or particulate matter emitted from any process source operation which is less than forty (40) percent opacity for any period or periods aggregating no more than five (5) minutes in any sixty (60) minute period.
[45CSR§7-3.2.]
- 5.1.3. No person shall cause, suffer, allow or permit particulate matter to be vented into the open air from the scrubber stack (S-06) in excess of 37 pph.
[45CSR§7-4.1.]

5.2. Monitoring Requirements

- 5.2.1. Visual emission checks shall be conducted monthly. For the purpose of these checks, excess visible emissions are to include visible fugitive dust emissions that leave the plant site boundaries. These checks shall be conducted during periods of facility operation for a sufficient time interval to determine if the unit has visible emissions using procedures outlined in 40 CFR 60, Appendix A, Method 22. If sources of visible emissions are identified during the survey, or at any other time, permittee shall conduct an evaluation as outlined in 45CSR§7A-2.1.a,b within three (3) days unless the permittee can demonstrate a valid reason that the time frame should be extended. A 45CSR§7A-2.1.a,b evaluation shall not be required if the visible emission condition is corrected in a timely manner and the units are operated at normal operating conditions. A record of each visible emission check required above shall be maintained on site stating the date and time of each emission check, the visible emissions survey results and, if appropriate, all corrective actions taken.
[45CSR§30-5.1.c.]
- 5.2.2. The permittee shall monitor the pressure drop across the scrubber and the pressure drop across the multiclones, this data will be recorded with the plant data logging system as averaged on a three-hour basis during all periods of operation of the product coolers.
- a. Continual compliance with PM emission limits shall be demonstrated by maintaining the pressure drop across the scrubber between 0.5 and 10 inches of water, as averaged on a three-hour basis, and
- b. The pressure drop across the multiclones target is 0.5–8 inches of water, as averaged on a three-hour basis.
[45CSR§30-5.1.c.]

5.3. Testing Requirements

- 5.3.1. Testing once per permit term or at the request of the Director shall be performed to demonstrate compliance with the weight based PM emission limits.
[45CSR§7-8.1. and 45CSR§30-5.1.c.]

5.4. Recordkeeping Requirements

- 5.4.1. The Permittee shall keep records of each test for weight based particulate matter emissions.
[45CSR§30-5.1.c.]
- 5.4.2. In accordance with Section 5.2.2. of this permit, the Permittee shall keep records of scrubber and multiclone operating conditions on a computerized data system.
[45CSR§30-5.1.c.]

5.5. Reporting Requirements

- 5.5.1. None.

5.6. Compliance Plan

- 5.6.1. None.

6.0. Requirements for Storage silos [CCS-01 through CCS-13 and GCS-01 through GCS-06] and Storage Bins [CB-01 through CB-14]

6.1. Limitations and Standards

- 6.1.1. No person shall cause, suffer, allow, or permit visible emissions from any storage structure(s) associated with any manufacturing process(es) that pursuant to 45CSR§7-5.1. is required to have a full enclosure and be equipped with a particulate matter control device.
[45CSR§7-3.7.]
- 6.1.2. No person shall cause, suffer, allow or permit any storage structure generating fugitive particulate matter to operate that is not equipped with a system, which may include, but not be limited to, process equipment design, control equipment design or operation and maintenance procedures, to minimize the emissions of fugitive particulate matter. To minimize means such system shall be installed, maintained and operated to ensure the lowest fugitive particulate matter emissions reasonably achievable.
[45CSR§7-5.1.]

6.2. Monitoring Requirements

- 6.2.1. Visual emission checks shall be conducted monthly. For the purpose of these checks, excess visible emissions are to include visible fugitive dust emissions that leave the plant site boundaries. These checks shall be conducted during periods of facility operation for a sufficient time interval to determine if the unit has visible emissions using procedures outlined in 40 CFR 60, Appendix A, Method 22. If sources of visible emissions are identified during the survey, or at any other time, permittee shall conduct an evaluation as outlined in 45CSR§7A-2.1.a,b within three (3) days unless the permittee can demonstrate a valid reason that the time frame should be extended. A 45CSR§7A-2.1.a,b evaluation shall not be required if the visible emission condition is corrected in a timely manner and the units are operated at normal operating conditions. A record of each visible emission check required above shall be maintained on site stating the date and time of each emission check, the visible emissions survey results and, if appropriate, all corrective actions taken.
[45CSR§30-5.1.c.]
- 6.2.2. The permittee shall maintain a pressure gauge on all dust collectors for pressure drop observations. If the pressure drop is outside of the acceptable range (3 to 7 inches of water column), as averaged on a monthly basis during all periods of operation of the storage silos, then the permittee shall perform maintenance on the dust collector to bring the pressure drop back into the acceptable range. If the pressure drop on inspection is below the minimum acceptable level, and records show that the dust collector has had new bags installed and that the dust collector has not been operated for a minimum of 60 hours after the installation of the new bags, the permittee is exempt from this maintenance. Records shall state the date and time of each dust collector inspection, the inspection results and corrective actions taken, if any, and reference to the work order number and date under which dust collector bags were replaced if the permittee is claiming this exemption.
[45CSR§30-5.1.c.]

6.3. Testing Requirements

- 6.3.1. None

6.4. Recordkeeping Requirements

- 6.4.1. Records shall be maintained on site stating the date and time of each baghouse's annual preventative maintenance activity, the results of the annual preventative maintenance activity, and all corrective actions taken.

[45CSR§30-5.1.c.]

6.5. Reporting Requirements

- 6.5.1. None.

6.6. Compliance Plan

- 6.6.1. None.

7.0. Requirements for Fines Pelletizer [PEL-01]

7.1. Limitations and Standards

- 7.1.1. No person shall cause, suffer, allow or permit emission of smoke and/or particulate matter into the open air from any process source operation which is greater than twenty (20) percent opacity, except as noted in Section 7.1.2. of this permit.
[45CSR§7-3.1.]
- 7.1.2. The provisions of Section 7.1.1. shall not apply to smoke and/or particulate matter emitted from any process source operation which is less than forty (40) percent opacity for any period or periods aggregating no more than five (5) minutes in any sixty (60) minute period.
[45CSR§7-3.2.]
- 7.1.3. If the fines pelletizer is restarted, particulate emissions from the Coke Fines Pelletizer, Equipment ID No. PEL-01 shall be vented to and controlled by the Baghouse designated as Control Device DC-14 and limited to 8.00 pounds per hour. Compliance with this emission limit shall demonstrate compliance with the emission limit from 45CSR§7-4.1.
[45CSR§7-4.1. and 45CSR13 - R13-0563, Permit Application]

7.2. Monitoring Requirements

- 7.2.1. If the fines pelletizer is restarted, then visual emissions checks of the emission point specified shall be conducted monthly. For the purpose of these checks, excess visible emissions are to include visible fugitive dust emissions that leave the plant site boundaries. These checks shall be conducted during periods of facility operation for a sufficient time interval to determine if the unit has visible emissions using procedures outlined in 40 CFR 60, Appendix A, Method 22. If sources of visible emissions are identified during the survey, or at any other time, permittee shall conduct an evaluation as outlined in 45CSR§7A-2.1.a,b within three (3) days unless the permittee can demonstrate a valid reason that the time frame should be extended. An opacity evaluation shall not be required if the visible emission condition is corrected within three (3) days after the visible emission was identified and the units are operated at normal operating conditions.
[45CSR§30-5.1.c.]

7.3. Testing Requirements

- 7.3.1. If the Fines Pelletizer is restarted, then testing once per permit term or at the request of the Director shall be performed to demonstrate compliance with the weight based PM emission limits.
[45CSR§30-5.1.c.]

7.4. Recordkeeping Requirements

- 7.4.1. If the fines pelletizer is restarted, then the permittee shall keep records of each visible emission check required in 7.2.1. Said record shall include, but not be limited to, the date, time, name of emission unit, the applicable visible emissions requirement, the result of the check, what action(s), if any, was/were taken, and the name of the observer.
[45CSR§30-5.1.c.]

- 7.4.2. Records shall be maintained on site stating the date and time of each baghouse's annual preventative maintenance activity, the results of the annual preventative maintenance activity, and all corrective actions taken.
[45CSR§30-5.1.c.]

7.5. Reporting Requirements

- 7.5.1. None.

7.6. Compliance Plan

- 7.6.1. None.

8.0. Requirements for Barge Unloading/Barge Loading Operations [HOP1, IFB1, IBC1, IBC2, IC1, OBC1, OC1]

8.1. Limitations and Standards

- 8.1.1. No person shall cause, suffer, allow or permit emission of smoke and/or particulate matter into the open air from any process source operation which is darker in shade or appearance than that designated as No. 1 Ringelmann or twenty (20) percent opacity, except as noted in 45CSR§§7-3.2, 3.3, 3.4, 3.5, 3.6, and 3.7.
[45CSR§7-3.1 and 45CSR13 - R13-2095, Condition B.2 and B.3]
- 8.1.2. No person shall cause, suffer, allow or permit visible emissions from any storage structure(s) associated with any manufacturing process(es) that pursuant to 45CSR§7, subsection 5.1 is required to have a full enclosure and be equipped with a particulate matter control device.
[45CSR§7-3.7 and 45CSR13 - R13-2095, Condition B.2 and B.3]
- 8.1.3. No person shall cause, suffer, allow or permit any manufacturing process or storage structure generating fugitive particulate matter to operate that is not equipped with a system, which may include, but not be limited to, process equipment design, control equipment design or operation and maintenance procedures, to minimize the emissions of fugitive particulate matter. To minimize means such system shall be installed, maintained and operated to ensure the lowest fugitive particulate matter emissions reasonably achievable.
[45CSR§7-5.1 and 45CSR13 - R13-2095, Condition B.2 and B.3]
- 8.1.4. The throughput of green petroleum coke shall not exceed 1,761,000 tons per year.
[45CSR13 - R13-2095, Condition A.1.]
- 8.1.5. The throughput of calcined petroleum coke shall not exceed 433,500 tons per year.
[45CSR13 - R13-2095, Condition A.2.]
- 8.1.6. Partial Enclosures (PE) shall be used on green coke transfer points TP-1 and TP-1A.
[45CSR13 - R13-2095, Condition A.4.]
- 8.1.7. Manual water sprays shall be used, as needed to minimize atmospheric entrainment of dust into the air, on green coke transfer points TP-2, TP-3, and TP-4.
[45CSR13 - R13-2095, Condition A.5.]
- 8.1.8. Baghouses (BH1 and BH2) shall be used on calcined coke transfer points TP-5 & TP-6.
[45CSR13 - R13-2095, Condition A.6.]
- 8.1.9. A choke feed spout shall be used on calcined coke transfer point TP-7.
[45CSR13 - R13-2095, Condition A.7.]

8.2. Monitoring Requirements

- 8.2.1. Visual emission checks shall be conducted monthly. For the purpose of these checks, excess visible emissions are to include visible fugitive dust emissions that leave the plant site boundaries. These checks shall be conducted during periods of facility operation for a sufficient time interval to determine if the unit has visible emissions using procedures outlined in 40 CFR 60, Appendix A, Method 22. If sources of visible emissions are identified during the survey, or at any other time, permittee shall conduct an evaluation as outlined in

45CSR§7A-2.1.a,b within three (3) days unless the permittee can demonstrate a valid reason that the time frame should be extended. A 45CSR§7A-2.1.a,b evaluation shall not be required if the visible emission condition is corrected in a timely manner (within 48 hours) and the units are operated at normal operating conditions. A record of each visible emission check required above shall be maintained on site stating the date and time of each emission check, the visible emissions survey results and, if appropriate, all corrective actions taken.

[45CSR§30-5.1.c.]

- 8.2.2. The permittee shall maintain a pressure gauge on all dust collectors (BH1 and BH2) for pressure drop observations. If the pressure drop is outside of the acceptable range (3 to 7 inches of water column), as averaged on a monthly basis during all periods of operation of dust collectors, then the permittee shall perform maintenance on the dust collector to bring the pressure drop back into the acceptable range. If the pressure drop on inspection is below the minimum acceptable level, and records show that the dust collector has had new bags installed and that the dust collector has not been operated for a minimum of 60 hours after the installation of the new bags, the permittee is exempt from this maintenance. Records shall state the date and time of each dust collector inspection, the inspection results and corrective actions taken, if any, and reference to the work order number and date under which dust collector bags were replaced if the permittee is claiming this exemption.

[45CSR§30-5.1.c.]

8.3. Testing Requirements

- 8.3.1. At such reasonable times as the Director may designate, the operator of any manufacturing process source operation may be required to conduct or have conducted stack tests to determine the particulate matter loading in exhaust gases. Such tests shall be conducted in such manner as the Director may specify and be filed on forms and in a manner acceptable to the Director. The Director, or his duly authorized representative, may at his option witness or conduct such stack tests. Should the Director exercise his option to conduct such tests, the operator will provide all the necessary sampling connections and sampling ports to be located in such manner as the Director may require, power for test equipment and the required safety equipment such as scaffolding, railings and ladders to comply with generally accepted good safety practices.

[45CSR§7-8.1 and 45CSR13 - R13-2095, Condition B.2 and B.3]

- 8.3.2. The Director, or his duly authorized representative, may conduct such other tests as he or she may deem necessary to evaluate air pollution emissions.

[45CSR§7-8.2 and 45CSR13 - R13-2095, Condition B.2 and B.3]

8.4. Recordkeeping Requirements

- 8.4.1. Records shall be maintained on site stating the date and time of each baghouse's annual preventative maintenance activity, the results of the annual preventative maintenance activity, and all corrective actions taken.

[45CSR§30-5.1.c.]

- 8.4.2. The permittee shall maintain a certifiable record of the total throughput of coke through the facility on a monthly basis. The company shall use the forms supplied in Attachments B & C of this permit. This record is to be maintained onsite for a period not less than five (5) years. It shall be certified by a responsible official and made available, upon request, to the Director or his (her) authorized representative.

[45CSR13 - R13-2095, Condition A.3.]

8.5. Reporting Requirements

8.5.1. None.

8.6. Compliance Plan

8.6.1. None.

9.0. Emergency Generator Requirements [EN-02 through EN-06]

9.1. Limitations and Standards

9.1.1. You must meet the following requirements, except during periods of startup:

- a. Change oil and filter every 500 hours of operation or annually, whichever comes first.
- b. Inspect air cleaner every 1,000 hours of operation or annually, whichever comes first, and replace as necessary;
- c. Inspect all hoses and belts every 500 hours of operation or annually, whichever comes first, and replace as necessary.

During periods of startup, you must minimize the engine's time spent at idle and minimize the engine's startup time at startup to a period needed for appropriate and safe loading of the engine, not to exceed 30 minutes, after which time the non-startup emission limitations apply.

Note: If an emergency engine is operating during an emergency and it is not possible to shut down the engine in order to perform the work practice requirements, or if performing the work practice on the required schedule would otherwise pose an unacceptable risk under federal, state, or local law, the work practice can be delayed until the emergency is over or the unacceptable risk under federal, state, or local law has abated. The work practice should be performed as soon as practicable after the emergency has ended or the unacceptable risk under federal, state, or local law has abated. Sources must report any failure to perform the work practice on the schedule required and the federal, state or local law under which the risk was deemed unacceptable.

[40 CFR §§63.6602, 63.6625(h), Table 2c(1) and footnote 1; 45CSR34 (EN-02, EN-03, EN-04, and EN-05)]

- 9.1.2. a. You must be in compliance with the emission limitations, operating limitations, and other requirements in this subpart that apply to you at all times.
- b. At all times you must operate and maintain any affected source, including associated air pollution control equipment and monitoring equipment, in a manner consistent with safety and good air pollution control practices for minimizing emissions. The general duty to minimize emissions does not require you to make any further efforts to reduce emissions if levels required by this standard have been achieved. Determination of whether such operation and maintenance procedures are being used will be based on information available to the Administrator which may include, but is not limited to, monitoring results, review of operation and maintenance procedures, review of operation and maintenance records, and inspection of the source.

[40 CFR §63.6605 and 45CSR34 (EN-02, EN-03, EN-04, and EN-05)]

9.1.3. You must operate and maintain the stationary RICE and after-treatment control device (if any) according to the manufacturer's emission-related written instructions or develop your own maintenance plan which must provide to the extent practicable for the maintenance and operation of the engine in a manner consistent with good air pollution control practice for minimizing emissions:

[40 CFR §§63.6625(e)(2), 63.6640, Table 6(9); and 45CSR34 (EN-02, EN-03, EN-04, and EN-05)]

9.1.4. You must operate the emergency stationary RICE according to the requirements in paragraphs a. through c. below. In order for the engine to be considered an emergency stationary RICE, any operation other than emergency operation, maintenance and testing, emergency demand response, and operation in non-emergency situations for 50 hours per year, as described in paragraphs a. through c. below, is prohibited. If you do not

operate the engine according to the requirements in paragraphs a. through c. below, the engine will not be considered an emergency engine under this subpart and must meet all requirements for non-emergency engines.

- a. There is no time limit on the use of emergency stationary RICE in emergency situations.
- b. You may operate your emergency stationary RICE for the purposes specified below for a maximum of 100 hours per calendar year. Any operation for non-emergency situations as allowed by paragraphs c. below counts as part of the 100 hours per calendar year allowed by this paragraph b.

Emergency stationary RICE may be operated for maintenance checks and readiness testing, provided that the tests are recommended by federal, state or local government, the manufacturer, the vendor, the regional transmission organization or equivalent balancing authority and transmission operator, or the insurance company associated with the engine. The owner or operator may petition the Administrator for approval of additional hours to be used for maintenance checks and readiness testing, but a petition is not required if the owner or operator maintains records indicating that federal, state, or local standards require maintenance and testing of emergency RICE beyond 100 hours per calendar year.

- c. Emergency stationary RICE located at major sources of HAP may be operated for up to 50 hours per calendar year in non-emergency situations. The 50 hours of operation in non-emergency situations are counted as part of the 100 hours per calendar year for maintenance and testing and emergency demand response provided in paragraph b. The 50 hours per year for non-emergency situations cannot be used for peak shaving or non-emergency demand response, or to generate income for a facility to supply power to an electric grid or otherwise supply power as part of a financial arrangement with another entity.

[40 CFR §§63.6640(f)(1), (2)(i), (3); 40 CFR §§60.4211(f)(1), (2)(i), (3); 45CSR34; and 45CSR16]

- 9.1.5. **Stationary RICE subject to Regulations under 40 CFR Part 60.** A new compression ignition (CI) stationary RICE with a site rating of less than or equal to 500 brake HP located at a major source of HAP emissions must meet the requirements of 40 CFR part 63, subpart ZZZZ by meeting the requirements of 40 CFR part 60 subpart IIII, for compression ignition engines. No further requirements apply for such engines under 40 CFR part 63, subpart ZZZZ.

[40 CFR §63.6590(c)(7) and 45CSR34 (EN-06)]

- 9.1.6. You must certify Generator EN-06 to the emission standards specified below:

NO _x +NMHC (g/kW-hr)	CO (g/kW-hr)	PM (g/kW-hr)
4.7	5.0	0.40

[40 CFR §§60.4205(b), 60.4206, 60.4202(a)(2), 40 CFR §89.112, Table 1, and 45CSR16 (EN-06)]

- 9.1.7. Exhaust opacity from Generator EN-06 shall not exceed:

- 1. 20 percent during the acceleration mode;
- 2. 15 percent during the lugging mode; and
- 3. 50 percent during the peaks in either the acceleration or lugging modes.

Opacity levels are to be measured and calculated as set forth in 40 CFR part 86, subpart I. Notwithstanding the provisions of 40 CFR part 86, subpart I, two-cylinder nonroad engines may be tested using an exhaust muffler that is representative of exhaust mufflers used with the engines in use.

[40 CFR§60.4202(a)(2), 40 CFR §89.113, and 45CSR16 (EN-06)]

- 9.1.8. Owners and operators of stationary CI ICE with a displacement of less than 30 liters per cylinder that use diesel fuel must use diesel fuel that meets the requirements below for nonroad diesel fuel, except that any existing diesel fuel purchased (or otherwise obtained) prior to October 1, 2010, may be used until depleted.

Sulfur content: 15 ppm maximum per gallon for NR diesel fuel; and

Cetane index or aromatic content, as follows:

- (i) A minimum cetane index of 40; or
- (ii) A maximum aromatic content of 35 volume percent.

[40 CFR §60.4207(b), 40 CFR §80.510(b), and 45CSR16 (EN-06)]

- 9.1.9. If you are an owner or operator and must comply with the emission standards specified in Section 9.1.6., you must do all of the following, except as permitted under 40 CFR §60.4211(g):

1. Operate and maintain the stationary CI internal combustion engine and control device according to the manufacturer's emission-related written instructions;
2. Change only those emission-related settings that are permitted by the manufacturer; and
3. Meet the requirements of 40 CFR parts 89, 94 and/or 1068, as they apply to you.

You must comply by purchasing an engine certified to the emission standards in Section 9.1.6. The engine must be installed and configured according to the manufacturer's emission-related specifications, except as permitted under 40 CFR §60.4211(g).

[40 CFR §§60.4211(a) and (c), and 45CSR16 (EN-06)]

9.2. Monitoring Requirements

- 9.2.1. You must install a non-resettable hour meter if one is not already installed.

[40 CFR §63.6625(f) and 45CSR34 (EN-02, EN-03, EN-04, and EN-05)]

- 9.2.2. a. If you are an owner or operator of an emergency stationary CI internal combustion engine that does not meet the standards applicable to non-emergency engines, you must install a non-resettable hour meter prior to startup of the engine.

- b. If you are an owner or operator of a stationary CI internal combustion engine equipped with a diesel particulate filter to comply with the emission standards in 40 CFR §60.4204, the diesel particulate filter must be installed with a backpressure monitor that notifies the owner or operator when the high backpressure limit of the engine is approached.

[40 CFR §60.4209 and 45CSR16 (EN-06)]

9.3. Testing Requirements

- 9.3.1. Owners and operators of stationary CI ICE with a displacement of less than 30 liters per cylinder who conduct performance tests pursuant to this subpart must do so according to the requirements listed in 40 CFR §60.4212.

[40 CFR §60.4212 and 45CSR16 (EN-06)]

9.4. Recordkeeping Requirements

- 9.4.1. a. You must keep the records described in paragraphs 1. through 5. below.
1. A copy of each notification and report that you submitted to comply with this 40CFR63 subpart ZZZZ, including all documentation supporting any Initial Notification or Notification of Compliance Status that you submitted, according to the requirement in 40 CFR §63.10(b)(2)(xiv).
 2. Records of the occurrence and duration of each malfunction of operation (i.e., process equipment) or the air pollution control and monitoring equipment.
 3. Records of performance tests and performance evaluations as required in 40 CFR §63.10(b)(2)(viii).
 4. Records of all required maintenance performed on the air pollution control and monitoring equipment.
 5. Records of actions taken during periods of malfunction to minimize emissions in accordance with Section 9.1.2.b., including corrective actions to restore malfunctioning process and air pollution control and monitoring equipment to its normal or usual manner of operation.
- b. You must keep records of the maintenance conducted on the stationary RICE in order to demonstrate that you operated and maintained the stationary RICE and after-treatment control device (if any) according to your own maintenance plan if you own or operate an existing stationary emergency RICE.
- c. You must keep records of the hours of operation of the engine that is recorded through the non-resettable hour meter. The owner or operator must document how many hours are spent for emergency operation, including what classified the operation as emergency and how many hours are spent for non-emergency operation.
[40 CFR §§63.6655(a), (e)(2), (f)(1) and 45CSR34 (EN-02, EN-03, EN-04, and EN-05)]
- 9.4.2. a. If the emergency engine does not meet the standards applicable to non-emergency engines in the applicable model year, the owner or operator must keep records of the operation of the engine in emergency and non-emergency service that are recorded through the non-resettable hour meter. The owner must record the time of operation of the engine and the reason the engine was in operation during that time.
- b. If the stationary CI internal combustion engine is equipped with a diesel particulate filter, the owner or operator must keep records of any corrective action taken after the backpressure monitor has notified the owner or operator that the high backpressure limit of the engine is approached.
[40 CFR §§60.4214(b), (c), Table 5 and 45CSR16 (EN-06)]

9.5. Reporting Requirements

- 9.5.1. You must report each instance in which you did not meet each emission limitation or operating limitation in Section 9.1.1. These instances are deviations from the emission and operating limitations in this subpart. These deviations must be reported according to the requirements in 40 CFR §63.6650.
[40 CFR §63.6640(b) and 45CSR34 (EN-02, EN-03, EN-04, and EN-05)]

ATTACHMENT A
Rule 10 - SO₂ MONITORING PLAN
SO₂ EMISSIONS MONITORING PLAN
RAIN CII CARBON LLC CALCINING PLANT
MOUNDSVILLE, WEST VIRGINIA

This SO₂ Emissions Monitoring Plan is prepared in accordance with the requirements of 45 CSR 10A, § 6.4, as amended effective January 25, 2002.

1. Parameters monitored. During the calcining process, sulfur contained in feedstock is oxidized. This process results in emission of sulfur dioxide (SO₂), a pollutant regulated under the federal Clean Air Act. The West Virginia Department of Environmental Protection (WVDEP) has established emissions limitations of 2000 parts per million (ppm) of SO₂ from manufacturing process sources stacks. In order to determine compliance with this emissions limitation, Continuous Emission Monitoring Systems (CEMS) will be installed and operated on each kiln/incinerator stack to directly measure emissions of SO₂.
2. Monitoring method and frequency.
 - a. Continuous Emission Monitoring Systems (CEMS) to determine SO₂ emissions. CEMS means all equipment required for the determination of SO₂ gas concentration or emission rate, installed, calibrated, operated and maintained as specified in 40 CFR Part 60, Appendix B, Performance Specification 2 or Performance Specification 7 and 40 CFR Part 60, Appendix F. The CEMS shall be installed, operational and certified within twelve (12) months of the date of approval of this revised SO₂ monitoring plan.
 - b. Fuel sampling/analysis for sulfur content. If the CEMS ceases to operate, begin collecting representative, uncalcined and calcined coke samples within one hour of the CEMS failure to operate. Sample collection of uncalcined and calcined coke samples can end when the CEMS returns to operation. Develop daily composite uncalcined and calcined sample. Calculate S emissions using mass balance equation: (%S dry feed x tons of dry feed)-(%S dry product x tons of dry product) = Tons S emissions. Calculate SO₂ emissions: Tons S x 2 = Tons of SO₂. Calculate daily average SO₂ emissions concentration in ppm SO₂.
3. Compliance Range: Based upon CEMS output for each kiln/incinerator and, if CEMS is not functioning, based on coke sampling and material balance.
4. Operation of equipment: Operate the CEMS for each kiln/incinerator stack at all times during the calcining process for each kiln.
5. Response Plan. When the CEMS indicates that the SO₂ emissions are within 99% of the 2000 ppm emissions limit, sulfur fed to the kiln will be reduced as necessary to bring the estimated emissions to 97% of the 2000 ppm limit.
6. Reporting. In accordance with 45CSR10A (effective 1/25/02), Section 7.2.a., the facility will submit the "CEMS Summary Report" and/or a "CEMS Excursion and Monitoring System Performance Report" to the Secretary on a quarterly basis, to the extent required under paragraphs 7.2.a.1. through 7.2.a.4. All reports shall be postmarked no later than forty-five (45) days following the end of each calendar quarter.
