**Today's Activities**

On-site from 0600 to 1800. Primary focus of the day was load-out of contaminated soil generated from excavation of Areas 1A, 1B and 2. Additional excavation was performed in Areas 1B and 2. Approximately 814 tons transported off-site to landfill. Stockpiled soil was covered with plastic.

CORE staff review confirmatory sample results from Area 1A and determined that additional excavation was necessary at the location of sample 10. The area was over-excavated.

**Plan for next day**

The trucking company will have 7 trucks tomorrow (12/17/2015).  
The plan for 12/17/2015 is to load out all of the stockpiled soil and complete Area 1A.

**Deficiencies**

None noted or observed.

**Certification**

On behalf of CORE Environmental Services, Inc, I certify that this report is complete and accurate to the best of my knowledge.
