DATE: January 22, 2014

ORDER NO.: 8033

**INTRODUCTION**

The following findings are made and Order issued to Freedom Industries, Inc. pursuant to the authority vested in the Director of the Division of Water and Waste Management under Chapter 22, Article 11, Section 1 et seq. and Chapter 22, Article 12, Section 1 et seq. of the Code of West Virginia.

**FINDINGS OF FACT**

In support of this Order, the Director hereby finds the following:

1. Freedom Industries, Inc. operates a bulk storage distribution center located near Charleston, Kanawha County, West Virginia. The site was formerly operated by Ettowah River Terminal, LLC under WV/NPDES General Water Pollution Control Permit No. WV0111457, Registration No. WVG610920.
2. Freedom Industries, Inc. purchased the facility from Ettowah River Terminal, LLC on December 9, 2013.
3. On January 9, 2014, West Virginia Department of Environmental Protection (WVDEP) personnel received a complaint concerning an odor at / near the Freedom Industries, Inc. site. After investigation, the following was observed and documented:

Promoting a healthy environment.

- a. Free product was observed in secondary containment units surrounding above ground storage tanks containing a chemical described as 4-Methylcyclohexane Methanol (MCHM). It was also observed that this material had escaped the secondary containment unit and had entered the Elk River. Failure to maintain adequate secondary containment for above ground storage tanks is a violation of 47 CSR 58, Section 4.8.a.
  - b. It was determined that the intake for the local public water supply is located approximately 1.5 miles downstream of the discharge, and has been impacted.
  - c. The release of this spilled material has caused conditions not allowable in the Elk River by creating odors in the vicinity of state waters, by requiring an unreasonable degree of treatment for the production of potable water, and by creating a sheen on the surface of the water, a violation of 47 CSR 2, Section 3.
  - d. Freedom Industries, Inc. has failed to take any and all measures necessary to contain the spill and render it harmless, a violation of 47 CSR 11, Section 2.5.
4. At 12:05 p.m. on January 9, 2014, Bob Reynolds with Freedom Industries, Inc. reported the spill to the Emergency Response Spill Hotline. Mr. Reynolds indicated that the facility discovered a hole in the tank; as well as, the secondary containment unit was containing the spilled material.
  5. On January 21, 2014, Freedom Industries, Inc. provided information to WVDEP indicating that additional materials were present in the January 9, 2014 release to the Elk River. These materials were not included in the initial information regarding the composition of the spilled materials. Failure to accurately report "the type or types and quantity or quantities of the material or materials therein" is a violation of 47 CSR 11, Section 2.2.b.
